## The Problem

### 1.9M Americans Have a Substance Abuse Disorder Involving Prescription Pain Relievers

**90%**

- The percentage of prescription drug addictions that start in their teenage years.

- Drugfree.org

**70%**

- The percentage of abused medications that originate in the home.

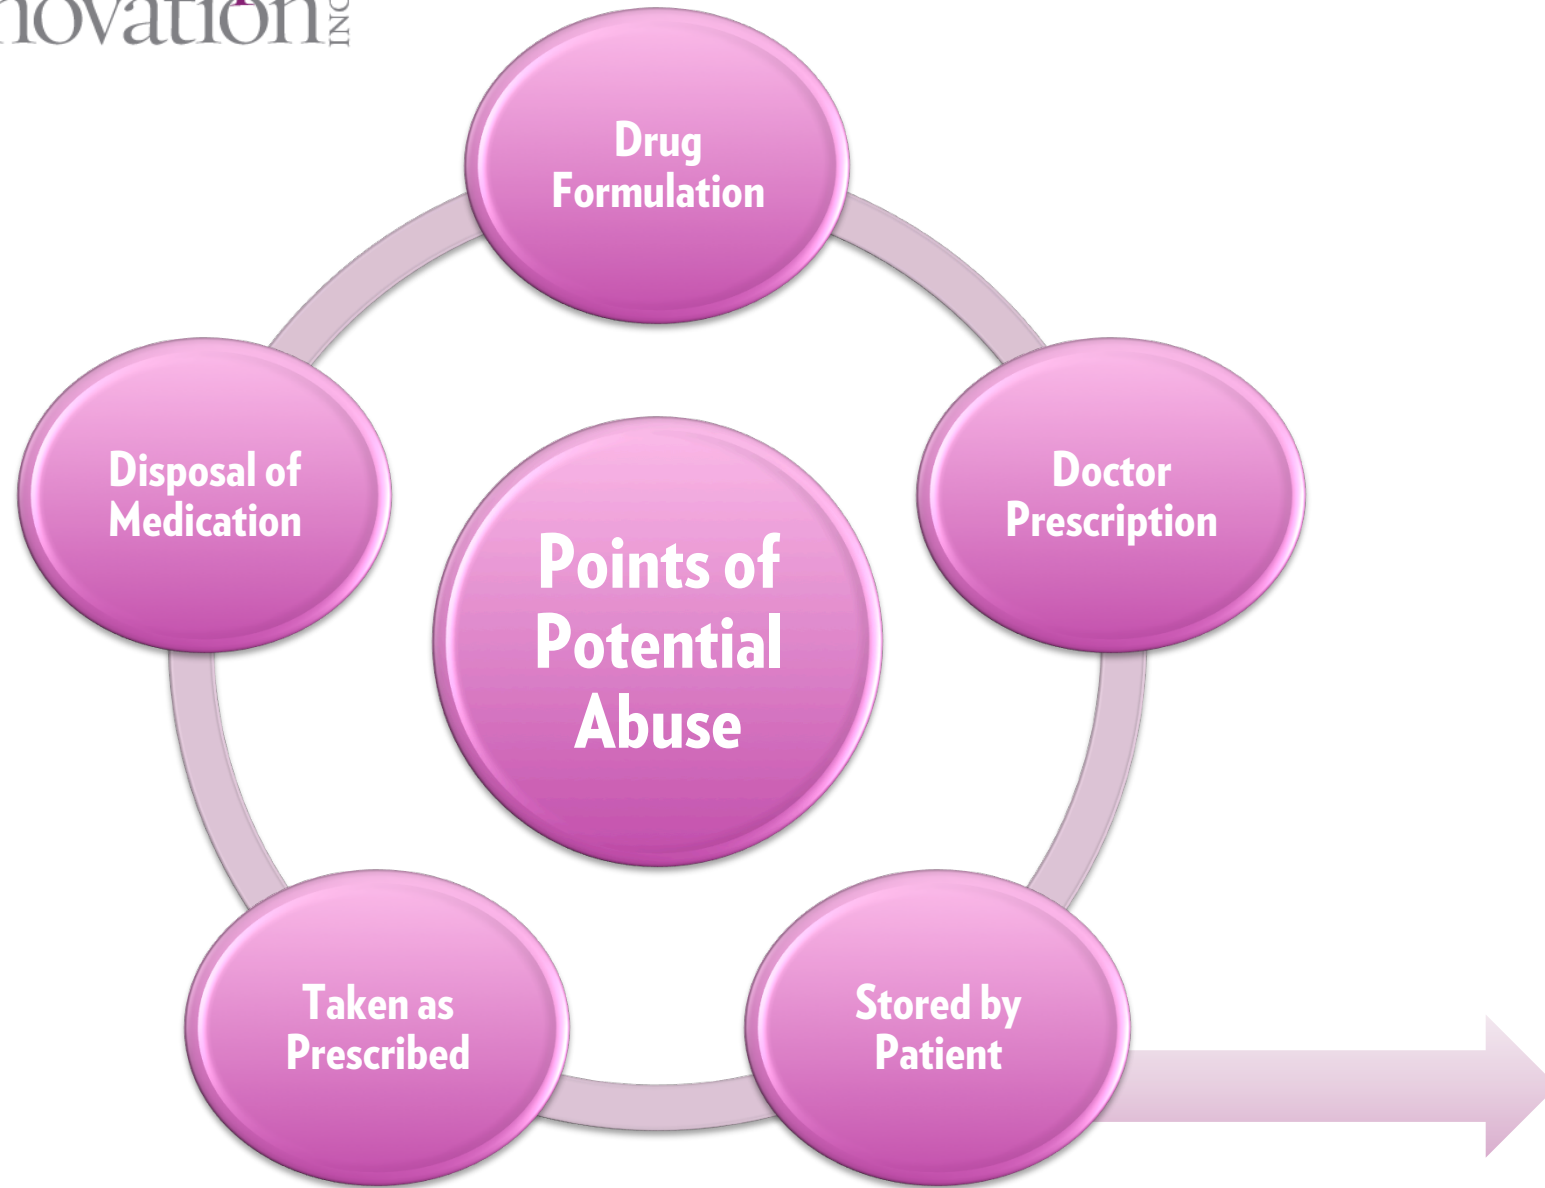

- CDC

**3%**

- The percentage of homes that currently lock up their medications.

- CDC

## Prevention Efforts

Safer Lock™  
*Live Safer*

## Solution: Remove Access

Patent US 8,662,330 B2  
Patent US 9,199,773 B2

- ✓ **CPSC Certified: Child Resistant & Senior Friendly**
- ✓ **USP 671 Certified: Moisture Resistant**
- ✓ **Fits Existing Pharma Vials Or Bottle Included**

# Why Patients Do Not Protect Their Medication

## Misconception

**‘A doctor prescribed the medication it must be safe.’**

**While the medication is important to the person it was prescribed to, it can often be dangerous to others.**

## Denial

**‘Not my...child, brother/sister, friend, babysitter, house cleaner, niece/nephew, etc...’**

## Awareness

**Patients are not educated about the affects of prescription drugs and do not know what tools are available to them.**

- Sold in Retail Pharmacies Across the United States
- Legislation in the State of Illinois Passed in September of 2015 Providing Incentives for Pharmacies to Dispense Hydrocodone in a 4-Digit Combination Locking Device.
- Cook County, IL Hospitals distribute Hydrocodone in Safer Lock Serving the Diverse Social Needs of their Patients.
- Pernix Therapeutics Makes Safer Lock Available to Patients Prescribed Zohydro ER.

## It Takes a Collaborative Effort

**Our mission is to save lives by preventing misuse before it starts.**

**We have a solution, but know that we cannot do this alone.**

**We are looking for partners who can join us in our mission to have every prescription drug stored safely.**
