FDA Adverse Event Reporting System (FAERS)

FOIA Case Report Information

Disclaimers:

Submission of a safety report does not constitute an admission that medical personnel, user facility, importer, distributor, manufacturer or product caused or contributed to the event. The information in these reports has not been scientifically or otherwise verified as to a cause and effect relationship and cannot be used to estimate the incidence of these events.

Data provided in the Quarterly Data Extract (QDE) or a FAERS FOIA report are a snapshot of FAERS at a given time. There are several reasons that a case captured in this snapshot can be marked as inactive and not show up in subsequent reports. Manufacturers are allowed to electronically delete reports they submitted if they have a valid reason for deletion. FDA may merge cases that are found to describe a single event, marking one of the duplicate reports as inactive. The data marked as inactive are not lost but may not be available under the original case number.

The FOIA case report information may include both Electronic Submissions (Esubs) and Report Images (Non-Esubs). Case ID(s) will be displayed under separate cover pages for the different submission types.

Unresponsive to stimuli	NA

Case ID: 11803222

Event/Problem Narrative:

MOTHER GAVE THE CHILD 2 BABY TEETHING TABLETS ON (b) (6) FOR THE FIRST TIME AND LAID HIM DOWN IN THE BOUNCER SEAT AND (b) (6) LATER CHILD WAS NOT BREATHING AND UNRESPONSIVE. MOTHER JOSTLED HIM AND HE WOULD NOT WAKE UP. GAVE HIM CPR AND CALLED AN AMBULANCE. CHILD HAD ANOTHER EPISODE IN THE HOSPITAL WHERE HE TURNED BLUE AND AGAIN STOPPED BREATHING. CHILD WAS GIVEN A BARIUM SWALLOW TEST TO RULE OUT REFLUX, EKG, URINALYSIS, HEART ECHO AND ALL TESTS ARE NORMAL. DOCTORS BELIEVE SYMPTOMS RELATED TO USE OF BABY TEETHING TABLETS BECAUSE THEY CANNOT DETERMINE ANOTHER CAUSE ALTHOUGH THERE IS A SLIGHT POSSIBILITY THAT SYMPTOMS COULD BE DUE TO REFLUX.

Relevant Medical History:

BORN AT 36 WEEKS - SLIGHTLY PREMATURE. NO FAMILY HISTORY OF SEIZURES.

Event Information:

Preferred Term (MedDRA Version: 18.1)	ReC
Hypopnoea	NA
Seizure	NA

Event/Problem Narrative:

THE REPORTER'S 10-MONTH-OLD SON HAS BEEN USING THE "BABY TEETHING TABLETS" SINCE JULY. THE REPORTER STATED THAT THE CHILD HAS BEEN EXPERIENCING SEIZURES SINCE BEGINNING USE OF THE TABLETS. THE REPORTER STATED THAT THE CHILD HAD HIS FIRST SEIZURE "A COUPLE OF WEEKS" AFTER HIS FIRST DOSE OF THE "BABY TEETHING TABLETS." SHE STATED THAT SINCE THEN, HE HAS BEEN HOSPITALIZED 5 OR 6 TIMES WITH SEIZURES AND THAT THEY HAVE BEEN FORCED TO CALL AN AMBULANCE FOR HIM MULTIPLE TIMES. SHE STATED THAT SHE WOULD GIVE HIM AT MOST 2-3 TABLETS AT ONE TIME WHEN TEETHING SYMPTOMS WERE PRESENT AND THAT SHE WOULD DOSE HIM 1-2 TIMES PER DAY, DEPENDING ON THE SEVERITY OF THE SYMPTOMS. THE REPORTER STATED THAT HER SON WOULD BECOME FUSSY WITH TEETHING SYMPTOMS, SHE WOULD GIVE HIM A DOSE OF "BABY TEETHING TABLETS," AND THEN HE WOULD NURSE AND FALL ASLEEP. SHE STATED THAT ABOUT 30-45 MINUTES LATER, THE CHILD WOULD WAKE UP WITH A SEIZURE. SHE STATED THAT HE WOULD TENSE UP IN HIS SLEEP, AND THEN "HIS ENTIRE BODY WOULD SHAKE OR TREMOR REALLY

Case ID: 11823505

VIOLENTLY." SHE STATED THAT HIS MOUTH WOULD QUIVER AND HIS EYES WOULD ROLL UP TO THE LEFT OR RIGHT. SHE DESCRIBED HOW HE WOULD MAKE NOISES THAT SOUNDED AS IF HE WAS GASPING FOR BREATH AND THAT "A COUPLE OF TIMES HE STOPPED BREATHING AND WOULD TURN BLUE." SHE STATED THAT THE SEIZURES WOULD TYPICALLY LAST FOR ABOUT 2-3 MINUTES AND THAT SHE HAS THE SEIZURES ON VIDEO FOR MEDICAL PURPOSES. THE REPORTER DISCONTINUED USING THE "BABY TEETHING TABLETS" WITH HER SON ABOUT ONE MONTH AGO; HE HAS NOT HAS A SEIZURE SINCE DISCONTINUING USE OF THE PRODUCT. THE REPORTER STATED THAT THE CHILD'S BREATHING WOULD SLOW DOWN WHILE HE WAS SLEEPING, AS WELL. SHE STATED THAT IT WOULD SLOW TO THE POINT THAT IT APPEARED AS THOUGH HE WASN'T BREATHING FOR A FEW MINUTES, AND THEN HE WOULD "KIND OF GASP AND BE FINE." SHE STATED THAT THIS SYMPTOM HAS ALSO DISSIPATED SINCE DISCONTINUING USE OF THE "BABY TEETHING TABLETS." PER THE REPORTER, THE DOCTORS, INCLUDING NEUROLOGY SPECIALISTS, CANNOT FIND ANYTHING INDICATING A CAUSE FOR THE SEIZURES.

Relevant Medical History:

NO PRE-EXISTING CONDITIONS. THE CHILD IS EXCLUSIVELY BREAST-FED, AND THE MOTHER IS ON A STRICT DIET DUE TO BREAST-FEEDING. THE CHILD CURRENTLY HAS PRESCRIPTIONS FOR DIASTAT AND KLONOPIN; HE HAS NOT BEEN GIVEN THE DIASTAT AT HOME, BUT HE HAS BEEN GIVEN THE KLONOPIN TWICE. HE IS CURRENTLY TAKING NO OTHER MEDICATIONS.

Event/Problem Narrative:

MOTHER CALLED WANTING A REFUND OF $5 FOR BABY TEETHING TABLETS. SHE SAID HER 15 MONTH OLD SON HAD BEEN IN HOSPITAL FOR SEVERAL DAYS WITH SEIZURES, AND SHE HAD READ ON LINE THAT TEETHING TABLETS CAUSED THEM.
12/10/15 11 AM, HE RECEIVED 2 VACCINES: HEPATITIS A AND PNEUMOCOCCAL (NEW FOR HIM).
12/11/15 8:45 AM HE STARTED A FEVER IN THE MORNING AND MOTHER BROUGHT HIM TO THE DOCTOR WHO SAID HE WAS FINE AND RECOMMENDED TYLENOL.
12/11/15 AT 9 PM, HE HAD HIS FIRST AND ONLY DOSE OF 2 TABLETS OF BABY TEETHING TABLETS.
(b) (6) (b) (6) MOTHER CHECKED ON HIM AND FOUND HE WAS HAVING SEIZURES IN HIS SLEEP, WITH DIFFICULTY BREATHING, AND FACE TURNING BLUE. HIS FEVER WAS 104.8. HE WAS GIVEN MOUTH TO MOUTH RECUSCITATION AND TAKEN TO THE HOSPITAL.
(b) (6) IN HOSPITAL, HE HAD A SECOND SEIZURE AT 3:30 PM.
(b) (6) (b) (6) HE CONTINUED TO HAVE FEVERS WITH SPIKES UP TO 105.8 WHILE IN THE HOSPITAL.

Case ID: 11867472

Preferred Term (MedDRA Â Version: 19.0 **ReC**

HE WAS TESTED WITH CHEST X-RAY AND CAT SCAN (ALL NORMAL), AND WAS GIVEN IV FOR DEHYDRATION. DIAGNOSIS WAS : FEBRILE SEIZURES, CAUSE UNKNOWN. (b) (6) HE WAS RELEASED FROM HOSPITAL AT NIGHT AFTER 24 HOURS WITH NO FEVER.

Relevant Medical History:

THERE IS NO FAMILY HISTORY OF SEIZURES; HE HAS NO PRE-EXISTING CONDITIONS OR ALLERGIES.
12/10/15 11 AM, HE RECEIVED 2 VACCINES: HEPATITIS A AND PNEUMOCOCCAL.
HE HAD FEVER STARTING IN THE MORNING OF 12/11/15; IT CONTINUED UNTIL (b) (6) . IT RANGED FROM 102 F TO SPIKES UP TO 105.8 F.

Event/Problem Narrative:

THE REPORTER'S SON, WHO IS 5.5 MONTHS OLD, HAS EXPERIENCED 4 SEIZURES SINCE BEGINNING USE OF THE "TEETHING GEL" PRODUCT. THE REPORTER BEGAN USING THE PRODUCT ON THE CHILD WHEN HE WAS "A LITTLE OVER 2 MONTHS OLD." SHE STATED THAT THEY USED THE PRODUCT AS NEEDED, EVERY TWO OR THREE DAYS. THE REPORTER STATED THAT SHE DID NOT USE THE PRODUCT DAILY. THE CHILD EXPERIENCED HIS FIRST SEIZURE AT THE AGE OF 3 MONTHS. THE REPORTER STATED THAT THE CHILD'S EYES ROLLED BACK INTO HIS HEAD, AND HE BECAME UNRESPONSIVE AND STIFF. SHE STATED THAT THIS EPISODE LASTED FOR 5 MINUTES. PER THE REPORTER, EACH OF THE CHILD'S 4 SEIZURES HAVE BEEN THE SAME. PER THE REPORTER, THE CHILD'S DOCTOR STATED THAT IT SOUNDS AS THOUGH THE CHILD IS HAVING SEIZURES; PER THE REPORTER, THE CHILD HAS HAD AN EEG AND A CT SCAN, BOTH OF WHICH HAVE BEEN NORMAL. THE CHILD HAS AN APPOINTMENT FOR AN MRI ON MAY 24TH; THE REPORTER STATED THAT THE MRI SHOULD GIVE THEM MORE INFORMATION THAN THE CT SCAN. PER THE REPORTER, THE DOCTOR

Case ID: 12389148

TOLD HER THAT THEY WERE "GOING TO LOOK FOR A CAUSE" OF THE SEIZURES. THE CHILD'S LAST SEIZURE OCCURRED ON (b) (6) THE REPORTER STATED THAT THEY WENT TO THE HOSPITAL ON THIS DATE AND THAT THEY DISCONTINUED USING THE PRODUCT ON THIS DATE.

FOIA Case Report Information

Case ID: 12429653

Event/Problem Narrative:

MOTHER GAVE CHILD A DOSE AT 2:45 PM FOR TEETHING PAIN. AT 4:30 PM CHILD SEEMED OUT OF IT, STARING OFF BLANKLY INTO THE ROOF, TWITCHING, AND UNRESPONSIVE TO MOTHER TALKING TO HIM, BRIGHT RED FLUSHED CHEEKS AND A TEMPERATURE. MOTHER WAS GOING TO TAKE CHILD TO THE HOSPITAL, HOWEVER SYMPTOMS RESOLVED AND CHILD ONLY REMAINED TIRED AND FLUSHED. SYMPTOMS OCCURRED ONCE AGAIN THE FOLLOWING DAY AFTER TAKING 2 TABLETS AND SUBSEQUENTLY RESOLVED.

Seizure	NA

Event/Problem Narrative:

MOTHER STATES THAT WITHIN (b) (6) HOURS OF USING THE BABY TEETHING TABLETS FOR THE FIRST TIME CHILD HAD A SEIZURE. ALL TOGETHER CHILD HAD 4 SEIZURES- ONE IN (b) (6) TWO IN (b) (6) AND ONE IN (b) (6) CHILD WAS TAKEN TO CHILDREN'S HOSPITAL. THE MORNING THAT CHILD WENT TO THE HOSPITAL ER, SHE WAS GIVEN BTET AND WITHIN A COUPLE OF HOURS SHE HAD A SEIZURE. EACH SEIZURE HAPPENED WHILE CHILD WAS NURSING OR FALLING ASLEEP; CHILD CLAMPED DOWN, GOT STIFF AND RIGID AND STARTED TO SHAKE. MOTHER WOULD GENTLY SHAKE HER AND SHE WOULD WAKE UP. AFTER MOTHER DISCONTINUED THE TABLETS, THE SEIZURES STOPPED.

Case ID: 12726345

Relevant Medical History:

WENT TO CHILDREN'S HOSPITAL ER FOR EVALUATION. DOCTOR CAME UP WITH A DIAGNOSIS OF SEIZURES BY QUESTIONING BECAUSE IT WAS TOO LATE TO DO AN EEG AS CHILD WAS NOT EXPERIENCING SEIZURES WHILE IN THE HOSPITAL. ACID REFLUX ON OCCASION. NO FAMILY HISTORY OF SEIZURES.

Disclaimers:
Submission of a safety report does not constitute an admission that medical personnel, user facility, importer, distributor, manufacturer or product caused or contributed to the event. The information in these reports has not been scientifically or otherwise verified as to a cause and effect relationship and cannot be used to estimate the incidence of these events.

Data provided in the Quarterly Data Extract (QDE) or a FAERS FOIA report are a snapshot of FAERS at a given time. There are several reasons that a case captured in this snapshot can be marked as inactive and not show up in subsequent reports. Manufacturers are allowed to electronically delete reports they submitted if they have a valid reason for deletion. FDA may merge cases that are found to describe a single event, marking one of the duplicate reports as inactive. The data marked as inactive are not lost but may not be available under the original case number.

APR – 8 2015

STANDARD HOMEOPATHIC
MADE IN THE USA SINCE 1903

Serious Adverse Event
SAE-0013-2015

Product in Inventory:

No (0) units of Hyland's Baby Teething Tablets (BTET), lot # A08815, are currently in the Standard Homeopathic Co. (SHC) warehouse. All other units of the (b) (4) units have been distributed.

Review of Records:

The Hyland's Baby Teething Tablets lot # A08815 associated manufacturing and packaging records were reviewed and did not reveal any issues.

The Quality Control analysis was reviewed and indicated all results, including microbial, were within specification for Hyland's Baby Teething Tablets lot # A08815. The Baby Teething bulk lot # 124034 was tested for total Atropine and Scopolamine and the results were with in specification of ≤(b)(4) ppm.

Retention Samples:

A visual inspection of the retention samples was conducted and no issues were noted with the packaging of the products. The inspection also included a visual inspection of the contents of the bottle and it was confirmed that it matched the specifications.

The inspection did not yield any results that may be related to this incident.

Other investigations:

A review of the Deviation system was conducted and no Deviations were reported related to this lot of product. Of the units manufactured one other complaint has been received for Hyland's Baby Teething Tablets lot # A08815. The other complaint was also an SAE (SAE-0010-2015). The complaints were reviewed and although both complaints did indicate that the patient "had trouble breathing" they appear to be isolated and do not represent a trend. We will continue to monitor our reported incidents for potential trends.

Conclusion:

The investigation did not reveal any issues with the manufacturing or packaging processes for these lots of Hyland's Baby Teething Tablets lot # A08815.

Manufacture and processing occurred within established procedures to ensure product quality.

11012660-01-00-03

STANDARD HOMEOPATHIC
MADE IN THE USA SINCE 1903

Serious Adverse Event
SAE-0012-2015

Product in Inventory:

The reporter only provided the product name, Hyland's Baby Teething Tablets (BTET) but no lot number, location of purchase or date of purchase for the units involved.

Review of Records:

Without the lot number a review of the batch records is not possible. Although a lot number was not provided all BTET lots are tested for disintegration and typically disintegrate in less than 20 seconds.

Retention Samples:

No retention samples were inspected because without the lot number of the products a review is not possible.

Other investigations:

With no lot number for the units involved a review the customer complaints and Deviation systems is not possible. However a review of the customer complaint system was performed and it did reveal that in the last twelve months that there have been one hundred thirty eight (138) Adverse Events (AE) which also included forty six (46) Serious Adverse Events (SAE) reported for Hyland's Baby Teething Tablets (BTET). The reports were reviewed and there does not appear to be any trend. We will continue to monitor future reports for any possible trends.

Although the BTET lot number cannot be determined Standard Homeopathic Company does submit all Baby Teething Tablet lots for atropine, scopolamine and CBOT testing. The results for Clostridia botulinum have been "negative" and the total Atropine and Scopolamine levels and was found to meet the specification of ≤ (b)(4) ppm.

Conclusion:

Due to the limited information provided by the reporter no further investigation is possible at this time of this incident. Standard Homeopathic Co. has established and maintains procedures to ensure product quality.

NATURE OF COMPLAINT: MOTHER POSTED THE FOLLOWING COMMENT ON HYLAND'S BABY TEETHING FACEBOOK PAGE: THIS PRODUCT MADE MY KID GET A SEIZURE LOOK INTO IT PLEASE!!! AUNT POSTED THE FOLLOWING COMMENT ON (b) (6) IF ANY OF YOU HAVE TEETHING BABIES OR HAVE USED THIS PRODUCT, PLEASE STOP THE USE... (b) (6) MY 1 YEAR OLD NEPHEW HAD A SEIZURE RIGHT AFTER HE WAS GIVEN THESE TABLETS (ONE OF THE SYMPTONS OF USING THIS PRODUCT, WAS UNAWARE UNTIL WE DID A SYMPTOM RESEARCH))!! PLEASE STOP THE USE, IT WAS THE SCARIEST THING EVER IN OUR LIVES!!! THANK GOD HE WAS AND IS OK, AND WITHOUT KNOWING IT WAS A SEIZURE, THAT MY MOM WAS THERE TO GIVE HIM CPR!!! PLEASE DO NOT USE!! WAS UNABLE TO SPEAK TO MOTHER OVER THE PHONE BECAUSE SHE DID NOT CALL OR PROVIDE A NUMBER WHERE SHE COULD BE REACHED. **04/10/15 FOLLOW-UP:** EDYTA FRACKIEWICZ SPOKE WITH MOTHER AND CHILD IS CURRETLY DOING WELL. ON THE DAY OF THE SEIZURE THEY CALLED PARAMEDICS AND WENT TO THE ER. DOCTOR'S NOT SURE WHY THE CHILD HAD A SEIZURE AND THEY WILL DO FOLLOW-UP TESTS. NO FEVER OR ILLNESS AT THE TIME OF THE SEIZURE AND NO FAMILY HISTORY OF SEIZURES. CHILD BECAME STIFF AND STOPPED BREATHING FOR 3 MINUTES DURING THE SEIZURE. OFFERED A REFUND AND CUSTOMER DECLINED. SHE REQUESTED THAT HYLAND'S BABY TEETHING TABLETS BE REMOVED FROM THE MARKET.

SAE-0014-2015

Product in Inventory:

No (0) units of Hyland's Baby Teething Tablets (BTET), lot # A41614, are currently in the Standard Homeopathic Co. (SHC) warehouse. All other units of the [redacted] units have been distributed.

Review of Records:

The Hyland's Baby Teething Tablets lot # A41614 associated manufacturing and packaging records were reviewed and did not reveal any issues.

The Quality Control analysis was reviewed and indicated all results, including microbial, were within specification for Hyland's Baby Teething Tablets lot # A41614. The Baby Teething bulk lot # 123302 was tested for total Atropine and Scopolamine and the results were with in specification of [redacted] ppm.

Retention Samples:

A visual inspection of the retention samples was conducted and no issues were noted with the packaging of the products. The inspection also included a visual inspection of the contents of the bottle and it was confirmed that it matched the specifications.

The inspection did not yield any results that may be related to this incident.

Other investigations:

A review of the Deviation system was conducted and no Deviations were reported related to this lot of product. Of the units manufactured one other complaint (CC-0846-2014) has been received for Hyland's Baby Teething Tablets lot # A41614. The complaints were reviewed but they do not appear to be related. We will continue to monitor our reported incidents for potential trends.

Conclusion:

The investigation did not reveal any issues with the manufacturing or packaging processes for these lots of Hyland's Baby Teething Tablets lot # A41614.

Manufacture and processing occurred within established procedures to ensure product quality.

E-MAIL:

NATURE OF COMPLAINT: CUSTOMER SENT THE FOLLOWING E-MAIL: I BOUGH THE TEETHING GEL AND THE TEETHING TABLETS, BOTH YOUR BRANDS, AND I HAVE TO SAY THEY ARE DANGEROUS! THEY THICKENED THE SALIVA OF MY BABY AND MADE HIM CHOKE! THESE SHOULD COME WITH A WARNING ON THEM! **04/16/15 FOLLOW-UP:** SPOKE WITH CUSTOMER AND SHE INFORMED ME THAT CHILD HAD TROUBLE SWALLOWING AFTER USING BOTH TEETHING GEL AND BABY TEETHING TABLETS DUE TO THICK SALIVA WHICH HE STARTED CHOKING ON BOTH TIMES. CHOKING WAS SEVERE, SHE HAD TO LAY HIM ON HIS SIDE ON THE FLOOR AND OPEN HIS AIRWAY DUE TO DIFFICULTY BREATHING. ALMOST HAD TO PERFORM CPR. WILL RETURN THE PRODUCT TO THE STORE. NO MEDICAL ISSUES, NOT PREMATURE, NO KNOWN ALLERGIES, NO ILLNESS, NO FEVER. HAS AN APPOINTMENT TO SEE THE DOCTOR NEXT WEEK.

Individual Case Safety Report

11088037-01-00-04

STANDARD HIC SINCE 1903

se Event
2015

The reporter only provided the product name, Hyland's Baby Teething Tablets (BTET) & Hyland's Baby Teething Gel (TGEL) but no lot numbers, location of purchase or date of purchase for the units involved.

Review of Records:

Without the lot number a review of the batch records is not possible.

Retention Samples:

No retention samples were inspected because without the lot number of the products a review is not possible.

Other investigations:

With no lot number for the units involved a review the customer complaints and Deviation systems is not possible. However a review of the customer complaint system was performed and it did reveal that in the last twelve months that there have been two hundred seventeen (217) Adverse Events (AE) which also included fifty-one (51) Serious Adverse Events (SAE) reported for Hyland's Baby Teething Tablets (BTET). There were nine (9) Adverse Events (AE) and only one (1) of them as elevated to an SAE for they Hyland's Teething Gel. The reports were reviewed and there does not appear to be any trend. We will continue to monitor future reports for any possible trends.

Although the BTET and TGEL lot numbers cannot be determined Standard Homeopathic Company does submit all Baby Teething lots for atropine, scopolamine and CBOT testing. The results for Clostridia botulinum have been "negative" and the total Atropine and Scopolamine levels and was found to meet the specification of ≤ (b)(4) ppm.

Conclusion:

Due to the limited information provided by the reporter no further investigation is possible at this time of this incident. Standard Homeopathic Co. has established and maintains procedures to ensure product quality.

Teething Gel
Gel para la dentición

Hyland's Baby

FAST RELIEF OF PAIN AND IRRITABILITY FROM TEETHING
Alivio rápido para el dolor y la irritabilidad debido a la dentición

0.5 FL. OZ. (14.7 mL)

Active ingredients: Calcarea Phosphorica 12X HPUS, Chamomilla 6X HPUS, Coffea Cruda 6X HPUS, Belladonna 6X HPUS (0.0000003% alkaloids, calculated).

Uses: Temporarily relieves symptoms of pain, gentle restlessness and wakeful irritability due to cutting teeth. Helps reduce redness and teething discomfort.

Warnings: **Do not use:** more often than directed **after** more than 7 days in a row unless directed by doctor or dentist **if** your child has a known allergy to any ingredient in this product. **Stop use and ask a doctor if:** symptoms do not improve in 7 days **swelling**, rash or fever develops **irritation**, pain or redness persist or worsen

Keep out of reach of children. In case of accidental overdose, get medical help or contact a Poison Control Center immediately.

Directions: **wash** hands **cut** 1/8" off tip of tube to open **children under 3 years of age**, apply 1/4" ribbon to finger and rub carefully onto child's gums every 15 minutes as necessary **release** note: If your child has been crying or upset, your child may fall asleep after using this product because the pain has been relieved and your child can rest.

Other information: **do** not use if tube tip is broken or missing. **Hyland's** may also be contacted for emergency information about our products 24 hours a day, 7 days per week at (800) 624-9659.

Inactive ingredients: Citric Acid, Hydroxyethylcellulose, Potassium Sorbate, Purified Water, Sodium Benzoate, Sorbic Acid, Vegetable Glycerine.

Manufactured for: Hyland's, Inc., Los Angeles, CA 90031 www.hylandsbaby.com Rev. 003

11145186-01-00-02

Gave baby Hyland's Teething Tablets and he seemed to have side effects (slowed breathing, seizure-like shaking, and would stare off into space for a little bit). Only used them as needed (probably gave him about 10-16 tablets total). Ever since I stopped giving him the tablets, the symptoms subsided.

MOTHER REPORTED THAT CHILD HAD BEEN USING THE PRODUCT FOR A COUPLE OF DAYS. ON THE DAY OF THE SEIZURE WAS GIVEN 1 TAB COUPLE OF HOURS PRIOR TO SEIZURE. THEN 1/2 - 1 HOUR PRIOR TO THE SEIZURE GAVE SECOND TABLET. THE SEIZURE LASTED 15 MINUTES AND HE WAS TRANSPORTED TO CHILDREN'S HOSPITAL. HE FELL OVER DURING THE SEIZURE, STOPPED BREATHING, ALSO VOMITED AND ASPIRATED DURING THE SEIZURE, HIT HIS HEAD WHEN HE FELL, AND EYES ROLLED BACK. CHILD HAD NO FEVER, BUT SEIZURE WAS LABELED BY DOCTORS AS FEBRILE SEIZURE.

STATE: (b) (6)

COUNTRY: USA

ZIP CODE: N/A

PHONE #: (b) (6)

E-MAIL: N/A

NATURE OF COMPLAINT:

MOTHER POSTED THE FOLLOWING COMMENTS ON (b) (6) DO NOT USE THESE. THESE CAN CAUSE SEIZURES. MY SON HAD A SEIZURE WHILE USING THESE AND HAD NEVER HAD ONE BEFORE HE USED THEM AND HASN'T HAD ONE SINCE HE STOPPED USING THEM. HE HAD ONLY HAD TWO TABLETS THAT DAY. NO I CAN'T SAY FOR COMPLETE CERTAINTY THIS WAS THE ONLY CAUSE BUT I STRONGLY BELIEVE IT WAS A CONTRIBUTING FACTOR. WE HADN'T SEEN THE RECALL ON THESE FOR SEVERAL WEEKS AFTER HIS SEIZURE BUT DIDN'T TAKE LONG TO CONNECT THE DOTS. THAT WAS IN 2014. THE MOST TABLETS HE HAD IN A DAY WAS FOUR BY THE WAY. I'M VERY CAUTIOUS ABOUT MEDS WITH MY CHILDREN. SPOKE WITH MOTHER ON 5/21/15: SHE REPORTED THAT SHE THREW AWAY THE BOTTLE IN 2014. SON NEVER HAD A SEIZURE IN THE PAST, AND THEN HAD A SEIZURE IN APRIL OF 2014. CHILD HAD NO FEVER, BUT WAS LABELED BY DOCTORS AS FEBRILE SEIZURE. SEVERAL WEEKS LATER SHE FOUND INFORMATION ABOUT THE RECALL. SHE HAD JUST STARTED USING BTET A COUPLE DAYS PRIOR (WAS USING ORAJEL BEFORE THEN). BOUGHT A NEW BOTTLE FOR THE CHILD. THE SEIZURE LASTED 15 MINUTES AND HE WAS TRANSPORTED TO CHILDREN'S HOSPITAL. HE FELL OVER DURING THE SEIZURE, STOPPED BREATHING, ALSO VOMITED AND ASPIRATED, HIT HIS HEAD WHEN HE FELL, AND EYES ROLLED BACK. WAS GIVEN 1 TAB COUPLE OF HOURS PRIOR TO SEIZURE. THEN 1/2 TO 1 HOUR PRIOR TO THE SEIZURE GAVE SECOND TABLET. CUSTOMER DID NOT WANT A REFUND.

Serious Adverse Event
SAE-0017-2015

Product in Inventory:

The reporter only provided the product name, Hyland's Baby Teething Tablets (BTET) but no lot number, location of purchase or date of purchase for the units involved.

Review of Records:

Without the lot number a review of the batch records is not possible.

Retention Samples:

No retention samples were inspected because without the lot number of the products a review is not possible.

Other investigations:

With no lot number for the units involved a review the customer complaints and Deviation systems is not possible. However a review of the customer complaint system was performed and it did reveal that in the last twelve months that there have been one hundred forty-three (143) Adverse Events (AE) which also included fifty-two (52) Serious Adverse Events (SAE) reported for Hyland's Baby Teething Tablets (BTET). The reports were reviewed and there does not appear to be any trend. We will continue to monitor future reports for any possible trends.

Although the BTET lot number cannot be determined Standard Homeopathic Company does submit all Baby Teething Tablet lots for atropine, scopolamine and CBOT testing. The results for Clostridia botulinum have been "negative" and the total Atropine and Scopolamine levels and was found to meet the specification of ≤(b)(4) ppm.

Conclusion:

Due to the limited information provided by the reporter no further investigation is possible at this time of this incident. Standard Homeopathic Co. has established and maintains procedures to ensure product quality.

NDARD PATHIC USA SINCE 1903

Serious Adverse Event
SAE-0018-2015

Product in Inventory:

The reporter only provided the product name, Hyland's Baby Teething Tablets (BTET) but no lot number, location of purchase or date of purchase for the units involved.

Review of Records:

Without the lot number a review of the batch records is not possible.

Retention Samples:

No retention samples were inspected because without the lot number of the products a review is not possible.

Other investigations:

With no lot number for the units involved a review the customer complaints and Deviation systems is not possible. However a review of the customer complaint system was performed and it did reveal that in the last twelve months that there have been one hundred forty-three (143) Adverse Events (AE) which also included fifty-two (52) Serious Adverse Events (SAE) reported for Hyland's Baby Teething Tablets (BTET). The reports were reviewed and there does not appear to be any trend. We will continue to monitor future reports for any possible trends.

Although the BTET lot number cannot be determined Standard Homeopathic Company does submit all Baby Teething Tablet lots for atropine, scopolamine and CBOT testing. The results for Clostridia botulinum have been "negative" and the total Atropine and Scopolamine levels and was found to meet the specification of ≤(b)(4) ppm.

Conclusion:

Due to the limited information provided by the reporter no further investigation is possible at this time of this incident. Standard Homeopathic Co. has established and maintains procedures to ensure product quality.

Serious Adverse Event
SAE-0021-2015

Product in Inventory:

The reporter only provided the product name, Hyland's Baby Teething Tablets (BTET) & Hyland's Nighttime Baby Teething Tablets (BTNT) but no lot numbers, location of purchase or date of purchase for the units involved.

Review of Records:

Without the lot number a review of the batch records is not possible.

Retention Samples:

No retention samples were inspected because without the lot number of the products a review is not possible.

Other investigations:

With no lot number for the units involved a review the customer complaints and Deviation systems is not possible. However a review of the customer complaint system was performed and it did reveal that in the last twelve months that there have been one hundred forty-seven (147) Adverse Events (AE) which also included fifty-six (56) Serious Adverse Events (SAE) reported for Hyland's Baby Teething Tablets (BTET). The reports were reviewed and there does not appear to be any trend. We will continue to monitor future reports for any possible trends. There have been no other Adverse Events (AE) or Serious Adverse Events reported for the Hyland's Nighttime Baby Teething Tablet lots (BTNT)

Although, the BTET or BTNT lot numbers cannot be determined Standard Homeopathic Company does submit all Baby Teething Tablet and Nighttime Baby Teething Tablets lots for atropine, scopolamine and CBOT testing. The results for Clostridia botulinum have been "negative" and the total Atropine and Scopolamine levels and was found to meet the specification of $\leq^{(b)}_{(4)}$ ppm.

Conclusion:

Due to the limited information provided by the reporter no further investigation is possible at this time of this incident. Standard Homeopathic Co. has established and maintains procedures to ensure product quality.

4. Date of This Report (mm/dd/yyyy): 05/26/2015

5. Describe Event or Problem

THE REPORTER STATED THAT CHILD WAS GIVEN A 2 TABLET DOSE AND THEN WAS GIVEN A SECOND 2 TABLET DOSE "A COUPLE OF HOURS LATER" THEN ABOUT (b) (6) AFTER THE SECOND DOSE, THE CHILD BEGAN TO EXHIBIT CONVULSIONS, TURNED BLUE, AND HER EYES WERE ROLLING BACK IN HER HEAD. THE REPORTER STATED THAT THIS "SEIZURE" LASTED FOR ABOUT 30 SECONDS. FOLLOWING THIS EPISODE, THE REPORTER TOOK THE CHILD'S TEMPERATURE AND FOUND THAT SHE HAD A FEVER OF 103 DEGREES FAHRENHEIT. SOME TIME LATER, THE CHILD EXPERIENCED ANOTHER EPISODE SIMILAR TO THE FIRST, THAT LASTED FOR ABOUT ONE MINUTE. CHILD TAKEN TO THE ER. DOCTORS IN THE EMERGENCY DEPARTMENT WERE "NOT SURE YET" IF THESE EPISODES WERE SEIZURES. F/U 5/24/15: DIAGNOSED AS FEBRILE SEIZURES POSSIBLY DUE TO SPIKE IN TEMPERATURE CAUSED BY BABY TEETHING TABLETS.

MADE IN THE USA SINCE 1903

CUSTOMER COMPLAINT RECORD

Case ID: 11179851

SECTION I: **COMPLAINT**

COMPLAINT #: 2620

TAKEN BY: LILIANA GLUBISZ

DATE OF COMPLAINT: 05/23/2015

PRODUCT: HYLAND'S BABY TEETHING TABLETS

ITEM CODE: BTET

SIZE: T6

LOT NO.: 123037

REPORTER: (b) (6)

ADDRESS: N/A

N/A

CITY: N/A

STATE: (b) (6)

COUNTRY: USA

ZIP CODE: N/A

PHONE #: (b) (6)

E-MAIL: N/A

NATURE OF COMPLAINT: THE REPORTER'S 1-YEAR-OLD DAUGHTER WAS GIVEN 4 "BABY TEETHING TABLETS" TODAY FROM A SAMPLE PACKET. THE REPORTER STATED THAT SHE WAS GIVEN A 2 TABLET DOSE AND THEN WAS GIVEN A SECOND 2 TABLET DOSE "A COUPLE OF HOURS LATER." THE REPORTER STATED THAT ABOUT (b) (6) AFTER THE SECOND DOSE, THE CHILD BEGAN TO EXHIBIT CONVULSIONS, TURNED BLUE, AND HER EYES WERE ROLLING BACK IN HER HEAD. THE REPORTER STATED THAT THIS "SEIZURE" LASTED FOR ABOUT 30 SECONDS. FOLLOWING THIS EPISODE, THE REPORTER TOOK THE CHILD'S TEMPERATURE AND FOUND THAT SHE HAD A FEVER OF 103 DEGREES FAHRENHEIT. SOME TIME LATER, THE CHILD EXPERIENCED ANOTHER EPISODE SIMILAR TO THE FIRST, THOUGH THIS SECOND EPISODE LASTED FOR ABOUT ONE MINUTE. AT THE TIME OF THE CALL, THE REPORTER HAD BEEN IN THE EMERGENCY DEPARTMENT FOR ABOUT 90 MINUTES. HE STATED THAT THE DOCTORS IN THE EMERGENCY DEPARTMENT WERE NOT "NOT SURE YET" IF THESE EPISODES WERE SEIZURES. (SEE ATTACHED)

JUN – 9 2015

Form 0001

REPORTER: (b) (6) COMPLAINT # 1620

THE REPORTER STATED THAT THE CHILD HAS NEVER EXPERIENCED ANYTHING LIKE THIS BEFORE. HE STATED THAT SHE HAS NO KNOWN ALLERGIES.

THE REPORTER ASKED WHAT THE HALF LIFE WAS FOR BELLADONNA. HE STATED THAT HE WANTED TO KNOW THE MANUFACTURING DATE OF HIS LOT NUMBER TO MAKE SURE THAT THE TABLETS WERE NOT RECALLED. WHEN ASKED, HE STATED THAT THE CALCAREA CARBONICA ACTIVE INGREDIENT WAS LISTED AS A 6X POTENCY. HE STATED THAT IT WOULD BE OKAY TO CONTACT HIM TOMORROW.

F/U 05/24/2015 WITH THE REPORTER'S WIFE: SHE STATED THAT THE CHILD IS IMPROVING TODAY AND THAT HER FEVER HAS NOT GONE HIGHER THAN 101 DEGREES FAHRENHEIT TODAY. SHE STATED THAT THE ER DOCTOR DID NOT RECOMMEND TRANSFERRING THE CHILD TO A CHILDREN'S HOSPITAL AS THE CHILDREN'S FACILITY WAS LOCATED AN HOUR AWAY AND THE DOCTOR FELT THAT THE SITUATION WAS NO LONGER EMERGENT AS THE SEIZURES HAD ALREADY OCCURRED. SHE STATED THAT THE CHILD WAS NOT ADMITTED TO THE HOSPITAL. SHE STATED THAT THE CHILD'S FEVER YESTERDAY WAS ASSOCIATED WITH TEETHING. SHE STATED THAT THERE WAS SPECULATION BY THE ER DOCTOR THAT THE "BABY TEETHING TABLETS" COULD HAVE CAUSED THE LOW-GRADE FEVER TO SPIKE, WHICH MAY HAVE PROMPTED THE SEIZURES. SHE STATED THAT THE ER DOCTOR VERIFIED THAT THE CHILD EXPERIENCED TWO SEIZURES AND STATED THAT THEY COULD BE FEBRILE SEIZURES. I RECOMMENDED THAT THEY DISCONTINUE USING THE "BABY TEETHING TABLETS" AT THIS TIME AND THAT THEY CONTACT ME OR THE COMPANY IF THEY HAVE ANY OTHER QUESTIONS. I ALSO OFFERRED HER A REFUND, WHICH SHE SAID WOULD NOT BE NECESSARY.

11179851-01-00-05

VDARD
ATHIC
SA SINCE 1903

dverse Event
SAE-0019-2015

Product in Inventory:

No (0) units of Hyland's Baby Teething Tablets (BTET) packets, lot # 123037, are currently in the Standard Homeopathic Co. (SHC) warehouse. All other units of the (b)(4) units have been distributed.

Review of Records:

The Hyland's Baby Teething Tablets lot # 123037 associated manufacturing and packaging records were reviewed and did not reveal any issues.

The Quality Control analysis was reviewed and indicated all results, including microbial, were within specification for Hyland's Baby Teething Tablets lot # 123037. The Baby Teething bulk lot # 123037 was tested for total Atropine and Scopolamine and the results were with in specification of ≤(b)(4) ppm.

Retention Samples:

Retention samples of packets are not kept therefore an inspection of the packet retain was not possible.

Other investigations:

A review of the Deviation system was conducted and no Deviations were reported related to this lot of product. Of the units manufactured no other complaints have been received for Hyland's Baby Teething Tablets packets lot # 123037. A review of complaints associated with lots manufactured using the same bulk (123037) was conducted and four complaints (CC-0654-2014, CC-0847-2014, CC-0814-2014 & CC-0045-2015) were found. The complaints were reviewed but they do not appear to be related.

Conclusion:

The investigation did not reveal any issues with the manufacturing or packaging processes for these lots of Hyland's Baby Teething Tablets lot # 123037.

Manufacture and processing occurred within established procedures to ensure product quality.

Adverse Event
SAE-0023-2015

Product in Inventory:

No (0) units of Hyland's Baby Teething Tablets (BTET), lot # A36714, are currently in the Standard Homeopathic Co. (SHC) warehouse. All other units of the (b)(4) units have been distributed.

Review of Records:

The Hyland's Baby Teething Tablets lot # A36714 associated manufacturing and packaging records were reviewed and did not reveal any issues.

The Quality Control analysis was reviewed and indicated all results, including microbial, were within specification for Hyland's Baby Teething Tablets lot # A36714. The Baby Teething bulk lot # 123037 was tested for total Atropine and Scopolamine and the results were with in specification of ≤(b)(4) ppm.

Retention Samples:

A visual inspection of the retention samples was conducted and no issues were noted with the packaging of the products. The inspection also included a visual inspection of the contents of the bottle and it was confirmed that it matched the specifications.

The inspection did not yield any results that may be related to this incident.

Other investigations:

A review of the Deviation system was conducted and no Deviations were reported related to this lot of product. Of the units manufactured one other complaint (CC-0654-2014) has been received for Hyland's Baby Teething Tablets lot # A36714. A search of complaints of products manufactured using the same bulk lot (123037) was also conducted and revealed four complaints (CC-0847-2014, CC-0814-2014, CC-0045-2015 & CC-0422-2015). The complaints were reviewed and although CC-0422-2015 does indicate a similar reaction as indicated in this instance they do not appear to be related are both isolated incidents. We will continue to monitor our reported incidents for potential trends.

Conclusion:

The investigation did not reveal any issues with the manufacturing or packaging processes for these lots of Hyland's Baby Teething Tablets lot # A36714.

Manufacture and processing occurred within established procedures to ensure product quality.

JUL - 8 2015

11258215-01-00-04

VDARD
ATHIC
SA SINCE 1903

Iverse Event
SAE-0025-2015

Product in Inventory:

The reporter only provided the product name, Hyland's Baby Teething Tablets (BTET) & Hyland's Teething Tablets (TEET) but no lot numbers, location of purchase or date of purchase for the units involved.

Review of Records:

Without the lot number a review of the batch records is not possible.

Retention Samples:

No retention samples were inspected because without the lot number of the products a review is not possible.

Other investigations:

With no lot number for the units involved a review the customer complaints and Deviation systems is not possible. However a review of the customer complaint system was performed and it did reveal that in the last twelve months that there have been one hundred fifty-two (152) Adverse Events (AE) which also included fifty-seven (57) Serious Adverse Events (SAE) reported for Hyland's Baby Teething Tablets (BTET). There were ten (10) Adverse Events (AE) and nine (9) of them as elevated to an SAE for they Hyland's Teething Tablets (TEET). The reports were reviewed and there does not appear to be any trend. We will continue to monitor future reports for any possible trends.

Although the BTET lot number cannot be determined Standard Homeopathic Company does submit all Baby Teething lots for atropine, scopolamine and CBOT testing. The results for Clostridia botulinum have been "negative" and the total Atropine and Scopolamine levels and was found to meet the specification of ≤ (b)(4) ppm.

Conclusion:

Due to the limited information provided by the reporter no further investigation is possible at this time of this incident. Standard Homeopathic Co. has established and maintains procedures to ensure product quality.

CUSTOMER COMPLAINT RECORD

Ca[illegible]/5465

SECTION I: **COMPLAINT**

COMPLAINT #: 2628

TAKEN BY: TUTTI GOULD

DATE OF COMPLAINT: 06/22/2015

PRODUCT: BABY TEETHING TABLETS

ITEM CODE: BTET—T40

SIZE: 40 TABS

LOT NO.: B21514

REPORTER: (b) (6)

ADDRESS: N/A

N/A

CITY: N/A

STATE: (b) (6)

COUNTRY: USA

ZIP CODE: N/A

PHONE #: (b) (6)

E-MAIL: N/A

NATURE OF COMPLAINT: 9 MONTH OLD HAD SEIZURES ON (b) (6) HE HAD A FEVER OF 104, AND WAS GIVEN ONE DOSE ONCE OF 2 TABLETS OF BABY TEETHING TABLETS AT 6 PM. AT 8 PM HE EXPERIENCED 'BACK TO BACK SEIZURES', JERKING AND EYES ROLLING BACK, UNABLE TO CRY OR MAKE SOUNDS. MOTHER TOOK HIM TO THE HOSPITAL AND WHILE DRIVING THERE HE HAD A 5 MINUTE SEIZURE IN THE CAR. AT THE HOSPITAL, SHE DOES NOT REMEMBER IF THEY DID ANY TESTS, BUT HE DID SEE 2 DOCTORS WHO DIAGNOSED IT AS FEBRILE SEIZURES AND PRESCRIBED ANTIBIOTICS, MOTRIN AND TYLENOL. THE NEXT DAY, (b) (6) HE AGAIN DEVELOPED SEIZURES IN THE EVENING, HAD A FEVER OF 103-104, AND MOTHER TOOK HIM TO THE HOSPITAL WHERE THEY RECOMMENDED THE SAME TREATMENT: ANTIBIOTICS, MOTRIN AND TYLENOL. THEY SAID IF HE HAS SEIZURES AGAIN, TO TAKE HIM TO THE CHILDREN'S HOSPITAL.
AS OF YET, THE CHILD HAS NO TEETH, BUT HAS SYMPTOMS OF TEETHING: RUBBING HIS GUMS AND INCREASED SALIVATION.
MOTHER HAD GIVEN HIM MOTRIN AND TYLENOL PRIOR TO THIS EVENT WITH NO REACTION.

verse Event

SAE-0027-2015

Product in Inventory:

No (0) units of Hyland's Baby Teething Tablets (BTET), lot # B21514, are currently in the Standard Homeopathic Co. (SHC) warehouse. All other units of the (b)(4) units have been distributed.

Review of Records:

The Hyland's Baby Teething Tablets lot # B21514 associated manufacturing and packaging records were reviewed and did not reveal any issues.

The Quality Control analysis was reviewed and indicated all results, including microbial, were within specification for Hyland's Baby Teething Tablets lot # B21514. The Baby Teething bulk lot # 123902 was tested for total Atropine and Scopolamine and the results were with in specification of ≤(b)(4) ppm.

Retention Samples:

A visual inspection of the retention samples was conducted and no issues were noted with the packaging of the products. The inspection also included a visual inspection of the contents of the bottle and it was confirmed that it matched the specifications.

The inspection did not yield any results that may be related to this incident.

Other investigations:

A review of the Deviation system was conducted and no Deviations were reported related to this lot of product. Of the units manufactured one other complaint (CC-0490-2015) has been received for Hyland's Baby Teething Tablets lot # B21514. The complaints were reviewed and they do not appear to be related. We will continue to monitor our reported incidents for potential trends.

Conclusion:

The investigation did not reveal any issues with the manufacturing or packaging processes for these lots of Hyland's Baby Teething Tablets lot # B21514.

Manufacture and processing occurred within established procedures to ensure product quality.

NDARD PATHIC USA SINCE 1903

Adverse Event

CAE-0029-2015

Product in Inventory:

The reporter only provided the product name, Hyland's Baby Teething Tablets (BTET)) but no lot number, location of purchase or date of purchase for the units involved.

Review of Records:

Without the lot number a review of the batch records is not possible.

Retention Samples:

No retention samples were inspected because without the lot number of the products a review is not possible.

Other investigations:

With no lot number for the units involved a review the customer complaints and Deviation systems is not possible. However a review of the customer complaint system was performed and it did reveal that in the last twelve months that there have been one hundred thirty-two (132) Adverse Events (AE) which also included forty-nine (49) Serious Adverse Events (SAE) reported for Hyland's Baby Teething Tablets (BTET). The reports were reviewed and there does not appear to be any trend. We will continue to monitor future reports for any possible trends.

Although the BTET lot number cannot be determined Standard Homeopathic Company does submit all Baby Teething lots for atropine, scopolamine and CBOT testing. The results for Clostridia botulinum have been "negative" and the total Atropine and Scopolamine levels and was found to meet the specification of ≤(b)(4) ppm.

Conclusion:

Due to the limited information provided by the reporter no further investigation is possible at this time of this incident. Standard Homeopathic Co. has established and maintains procedures to ensure product quality.

11364562-01-00-02

My name is (b) (6) I have a now 17month old son by the name of (b) (6) Well I'm here to tell you my story . After my son 1st birthday (b) (6) he started growing his teeth . He was teething and his gums were in pain , so I went to Rite-Aid and I purchased Hyland's Teething Tablets . I started giving them to my son and As Needed for a few months . As of (b) (6) (b) (6) my son had a seizure and I called the paramedics and they rushed him to the hospital . They sent us home and on (b) (6) he had 2 more seizure and he was rushed to the hospital once again . They gave him a CatScan and 1 hour EEG and A MRI . He was also admitted I have all the proof and papers and I also have the same bottle of Hyland's Teething Tablets that I was giving my son for his teething . Today I searched on Google what can cause seizure in toddlers and it came up that Hyland's Teething Tablets Causes Seizure I was so shocked to see that the same teething tablets I was giving my son causes seizures and I Immediately Looked into what I need to do to get help please contact me as soon as possible for further information . Thank you ! My Number Is (b) (6) and my email is (b) (6)

Form # VD1

INDARD
OPATHIC
E USA SINCE 1903

Adverse Event
:-0032-2015

Product in Inventory:

The reporter only provided the product name, Hyland's Baby Teething Tablets (BTET)) but no lot number, location of purchase or date of purchase for the units involved.

Review of Records:

Without the lot number a review of the batch records is not possible.

Retention Samples:

No retention samples were inspected because without the lot number of the products a review is not possible.

Other investigations:

With no lot number for the units involved a review the customer complaints and Deviation systems is not possible. However a review of the customer complaint system was performed and it did reveal that in the last twelve months that there have been one hundred twenty-nine (129) Adverse Events (AE) which also included fifty-three (53) Serious Adverse Events (SAE) reported for Hyland's Baby Teething Tablets (BTET). The reports were reviewed and there does not appear to be any trend. We will continue to monitor future reports for any possible trends.

Although the BTET lot number cannot be determined Standard Homeopathic Company does submit all Baby Teething lots for atropine, scopolamine and CBOT testing. The results for Clostridia botulinum have been "negative" and the total Atropine and Scopolamine levels and was found to meet the specification of $\leq^{(b)(4)}$ ppm.

Conclusion:

Due to the limited information provided by the reporter no further investigation is possible at this time of this incident. Standard Homeopathic Co. has established and maintains procedures to ensure product quality.

PLEASE TYPE OR USE BLACK INK

11415807-01-00-02

We used Hyland's nighttime teething tablets on my 7 month old daughter starting 8/9/2015. She was given 2 tablets each following night before bedtime. That was the only time of day we gave her any pills. On 8/11/15, I noticed her have an episode which lasted approximately 5 minutes where she was repeatedly tilting her head to the right (ear to shoulder) and it appeared involuntary. This happened 4 other times throughout that day, but the morning episode went on for the longest amount of time. I got a video of her having one of her episodes that night. The following day, 8/12/15, she had 5 episodes throughout the day increasing in duration and her head tilts were getting jerkier and making her torso tilt towards that side. I have a video from that day midday. We saw her pediatrician 8/12/15 to show her the video and see if she had any idea what could be causing it. We didn't think to mention the teething tablets since they were homeopathic and had no warning labels about these adverse effects. On (b) (6) (b) (6) my daughter got much worse and was having torso and head spasms. I have a video of her having an episode in her highchair where her head and torso collapsed onto the tray and bobbed there. I drove her to Children's Hospital in (b) (6) 2 hours away. The doctors did a CT scan, found nothing wrong, and they admitted her to the neurology wing of the hospital. The next morning (b) (6) they ran an MRI which came back normal and did an EEG that afternoon. The neurologist filmed my video from (b) (6) because he said he had never seen anything like this. They discharged her after saying that her symptoms and spasms weren't lining up with any condition 100%. This whole time I hadn't given her any teething tablets because I had forgotten to pack them. She had very few episodes in the hospital. When we arrived home on (b) (6) I gave her a dose of 2 tablets that night before bed and the next morning she had an episode ten minutes after waking and several more throughout the day. I haven't given her any teething tablets since then and every day she has had less episodes. 8/20/15 and 8/21/15 she had zero head tilts or episodes of spasms. We will be following up with another neurologist, but our pediatrician's office said this could very well be a reaction to the Hyland Nighttime Teething Tablets and to discontinue use of them right now. I called Hyland's and they said they will be conducting testing on her lot. I would be happy to send you all of her videos if you need to see her reactions and how fast her condition worsened.

B.6. **Relevant Tests/Laboratory Data, Including Dates** *(continued)*

8/12/15-CT Scan came back perfect (b) (6) -MRI came back perfect and EEG came back perfect with one possible Rapid Eye Movement

---

B.7. **Other Relevant History, Including Preexisting Medical Conditions** *(e.g., allergies, race, pregnancy, smoking and alcohol use, hepatic/renal dysfunction, etc.) (continued)*

After taking Hylands teething tablets my 8 month old was extremely agitated and had involuntary twitching of her legs and abdomin. She seemed extremely uncomfortable for hours after having consumed them for the first time. I googled side effects and found the FDA warning for belladonna I was previously unaware of and wanted to report the issues we experienced

PLEASE TYPE OR USE BLACK INK

My baby is now 10 months old and I used the Hyland's Teething Tablets on him for approximately 7-8 days in which during that time, he began to suffer from what began as increasing eye blinks/winking to eye fluttering which turned into full blown eye twitching/spasms which was happening at least every 10-15 minutes throughout the day. Sometimes it occurred more often and often there would be several occurrences at once. I sought out help from his pediatrician who advised to stop the use of the teething tablets. It took about 2 days without any teething tablets and the extent of the twitching began to decrease as well as the frequency. It has been approximately 6 days now without the teething tablets and we were only seeing 2-3 brief twitches throughout the day. As of mid day today as I write this, there have been no twitches. When this first occurred, there were NO other changes in routine, no new foods introduced, no other types of medications, nothing else that we can correlate with the start time of the twitching and nothing else has changed in his or our lifestyle to explain the decrease in the twitching other than the stopping of the use of the tablets. There was also an instance at approximately 3-4 months of age when I used the teething tablets and he experienced body twitching which I did not correlate with the teething tablets until now because that also stopped when he was not taking the tablets. At this time we are unsure if there is any other damage.

Form # VD1

11473233-01-00-04

INDARD
PATHIC
USA SINCE 1903

Adverse Event
SAE-0038-2015

Product in Inventory:

The reporter only provided the product name, Hyland's Baby Teething Tablets (BTET)) but no lot number, location of purchase or date of purchase for the units involved.

Review of Records:

Without the lot number a review of the batch records is not possible.

Retention Samples:

No retention samples were inspected because without the lot number of the products a review is not possible.

Other investigations:

With no lot number for the units involved a review the customer complaints and Deviation systems is not possible. However a review of the customer complaint system was performed and it did reveal that in the last twelve months that there have been one hundred thirty-five (135) Adverse Events (AE) which also included forty-nine (49) Serious Adverse Events (SAE) reported for Hyland's Baby Teething Tablets (BTET). The reports were reviewed and there does not appear to be any trend. We will continue to monitor future reports for any possible trends.

Although the BTET lot number cannot be determined Standard Homeopathic Company does submit all Baby Teething lots for atropine, scopolamine and CBOT testing. The results for Clostridia botulinum have been "negative" and the total Atropine and Scopolamine levels and was found to meet the specification of ≤ (b)(4) ppm.

Conclusion:

Due to the limited information provided by the reporter no further investigation is possible at this time of this incident. Standard Homeopathic Co. has established and maintains procedures to ensure product quality.

COMPLAINT #: 2640

DATE OF COMPLAINT: 08/21/2015

PRODUCT: BABY NIGHTTIME TEETHING TABLETS ITEM CODE: BTNT—T135

SIZE: 135 TABS LOT NO.: B31914

REPORTER: (b) (6)

ADDRESS:

CITY: STATE: (b) (6)

COUNTRY: USA ZIP CODE:

PHONE #: (b) (6)

E-MAIL: N/A

NATURE OF COMPLAINT:

CUSTOMER POSTED THE FOLLOWING ON(b) (6) WE STARTED USING THE NIGHTTIME TEETHING TABLETS ABOUT 3 WEEKS AGO. MY DAUGHTER HAD "HEAD DROPS" A FEW DAYS AFTER WE STARTED THESE PILLS AND WE TOOK HER TO CHILDREN'S HOSPITAL IN (b) (6) HER EPISODES WERE GETTING MORE FREQUENT AND WORSE. THE PEDIATRICIANS AND NEUROLOGISTS DIDNT KNOW WHAT WAS WRONG AND I HAD FORGOTTEN THAT I HAD BEEN GIVING HER THESE PILLS. I ALSO LEFT YHE BOTTLE AT HOME AND SHE GOT SO MUCH BETTER QUICKLY. AFTER WE RETURNED HOME, I DIDN'T GUVE HER THE PILLS AND SHE HASN'T HAD ANY EPISODES IN THE PAST TWO DAYS. I'M WAITING ON A CALL BACK FROM OUR PEDIATRICIAN ABOUT THIS BEING RELATED TO HER UNEXPLAINED CONDITION, BUT THE TIMING OF HER EPISODES AND THE USE OF THIS MEDICATION LINES UP. WE JUST REALIZED THIS YESTERDAY AFTER ANOTHER MOM ASKED IF WE HAD BEEN USING THESE TABLETS AFTER SEE IN OUR VIDEO. I AM VERY CONCERNED AND UPSET ABOUT THIS. SPOKE WITH THE MOTHER THAT SAME DAY. CHILD STARTED HAVING SYMPTOMS OF HEAD JERKING/DROPPING, TORSO TILTING AND UPPER BODY SPASMS SEVERAL TIMES A DAY. (b) (6) CHILD WAS TAKEN TO THE EMERGENCY ROOM AND ADMITTED TO THE NEUROLOGY DEPARTMENT. CT SCAN, MRI, AND EEG WERE NORMAL. MOTHER TOOK A VIDEO OF HER CHILD DOING THIS. GIVING THE TABLETS 2 TABS QHS X 1 WEEK. STOPPED THE TEETHING TABLETS(b) (6) WHEN CHILD WAS ADMITTED TO THE HOSPITAL. NEUROLOGY SAID THAT THEY DON'T KNOW WHAT THE EXACT DIAGNOSIS IS FOR SURE BECAUSE THEY HAVE NEVER SEEN THIS BEFORE BUT GAVE MOTHER A DIAGNOSIS OF BENIGN PAROXYSMAL TORTICOLLIS AND SPASMUS NUTANS. ONCE THEY CAME HOME FROM THE HOSPITAL AND STOPPED THE TEETHING TABLETS, CHILD HAS HAD FEWER EPISODES. MOTHER HAS READ THAT BELLADONNA CAN CAUSE SPASMS. MOTHER WOULD LIKE TO KNOW HOW TO TEST IF THE TABLETS CAUSED THE SYMPTOMS. MOTHER WANTS A REFUND OF SRP FOR ONE BOTTLE OF BTNT AND ONE BOTTLE OF BTET BECAUSE SHE IS AFRAID TO USE THEM IN HER BABY. SHE IS NOT HAPPY WITH THE PRODUCTS. WANTED TO KNOW IF HYLAND'S WOULD PAY FOR MEDICAL COSTS IF PRODUCT IS DETERMINED TO HAVE CAUSED THE SYMPTOMS IN HER CHILD. I INFORMED THE CUSTOMER THAT I COULD ONLY OFFER A REFUND FOR THE PRODUCT AND WOULD NOT BE ABLE TO AUTHORIZE PAYMENT FOR MEDICAL COSTS. CUSTOMER SAID THAT SHE WILL CALL BACK IN A FEW WEEKS TO ASK ABOUT THE RESULTS OF THE INVESTIGATION OF THE LOT # THAT SHE PROVIDED. MOTHER HAD EPILEPSY AS A CHILD THAT SHE OUTGREW. AUNT HAS GRAND MAL SEIZURES. OTHER FAMILY MEMBERS HAD TOURETTES. GRANDMOTHER HAS A GENETIC BRAIN DISEASE BUT BABY SHOWS NO SIGN OF IT. (CONTINUED ON NEXT PAGE)

F/U POSTED TO (b) (6)

Hey ladies! Here is my update on my baby girl who I took to the hospital a couple of weeks ago for head drops and spasms. We saw a neurologist today and he said she looks perfect. We have gone 5 days with no symptoms now. The neurologist believes that the nighttime teething tablets we had just started giving her, caused the seizures. He called them seizures but said they weren't epileptic, that they were likely triggered by the magnesium and/or belladonna in the tablets. We had started giving her the nighttime version about 3 days before her seizures became very obvious and I forgot to bring the bottle to the hospital to give her so she had less seizures up there. I gave her a couple of tablets when we got home that next night and the next day she had more seizures. Then I discontinued use and she had less each day than the day prior and now it's been 5 days seizure free. We didn't even think of those tablets causing any issues because she had the regular ones (not nighttime) several times with no reaction. We really believed that they were completely safe to give her because they were natural. We are relieved it was something that is easy to fix and we appreciate everyone's prayers. I will be contacting the company's legal department to complain and push them to put a warning on them that it could trigger a neurological reaction.
Edited to add: She has had an MRI, EEG, CT scan. All came back perfect. I took her to children's hospital where she was looked after by a team of neurologists and I took her to a separate neurologist who diagnosed her. We have looked into every possible condition or cause and the only thing that is possible or likely is that these tablets caused it. The dr especially believes that due to her timing of getting worse lining up with being on the medication for a couple of days and her getting better and becoming symptom free after stopping use.

F/U FROM PHONE CALL WITH (b) (6) 08/26/15

(b) (6) called me today insisting to speak with the legal department. She stated that she gave you a report last week about her child having seizures from the nighttime teething tablets. She said that she had gone to the ER and that the ER could not figure out what was wrong. She said the ER took a video and that she posted it on lots of moms groups and that it has 40,000 views in 12 hours. She said she took her child to a neurologist who told her he believes it is from the tablets specifically the mag phos and belladonna. She said that the neurologist says they are non-epileptic seizures since the child had 4 while on EEG and that they did not show up on the EEG. She says she owes a lot of money in hospital bills and that she is not going away. She also said the kids are napping and now is a good time to call. I told her I would have someone in management get back to her by end of business today. She said also said there should be a warning label on the tablets. I asked her phone number and state she was calling from. She said (b) (6) and phone (b) (6)

SAE-0039-2015

Product in Inventory:

No (0) units of Hyland's Baby Nighttime Teething Tablets (BTNT), lot # B31914, are currently in the Standard Homeopathic Co. (SHC) warehouse. All other units of the (b)(4) units have been distributed.

Review of Records:

The Hyland's Baby Nighttime Teething Tablets (BTNT), lot # B31914, associated manufacturing and packaging records were reviewed and did not reveal any issues.

The Quality Control analysis was reviewed and indicated all results, including microbial, were within specification for Hyland's Baby Nighttime Teething Tablets (BTNT), lot # B31914,. The Nighttime Baby Teething bulk lot # 125307 was tested for total Atropine and Scopolamine and the results were with in specification of ≤(b)(4) ppm.

Retention Samples:

A visual inspection of the retention samples was conducted and no issues were noted with the packaging of the products. The inspection also included a visual inspection of the contents of the bottle and it was confirmed that it matched the specifications.

The inspection did not yield any results that may be related to this incident.

Other investigations:

A review of the Deviation system was conducted and no Deviations were reported related to this lot of product and not other complaints for this lot have been reported.

Conclusion:

The investigation did not reveal any issues with the manufacturing or packaging processes for these lots of Hyland's Baby Nighttime Teething Tablets (BTNT), lot # B31914.

Manufacture and processing occurred within established procedures to ensure product quality.

NDARD PATHIC
USA SINCE 1903

Serious Adverse Event
SAE-0046-2015

Product in Inventory:

The reporter only provided the product name, Hyland's Baby Nighttime Teething Tablets (BTNT) but no lot number, location of purchase or date of purchase for the units involved.

Review of Records:

Without the lot number a review of the batch records is not possible.

Retention Samples:

No retention samples were inspected because without the lot number of the products a review is not possible.

Other investigations:

With no lot number for the units involved a review the customer complaints and Deviation systems is not possible. However a review of the customer complaint system was performed and it did reveal that in the last twelve months that there have been nine (9) Adverse Events (AE) which also included eight (8) Serious Adverse Events (SAE) reported for Hyland's Baby Nighttime Teething Tablets (BTNT). The reports were reviewed and there does not appear to be any trend. We will continue to monitor future reports for any possible trends.

Although the BTNT lot number cannot be determined Standard Homeopathic Company does submit all Baby Nighttime Teething lots for atropine, scopolamine and CBOT testing. The results for Clostridia botulinum have been "negative" and the total Atropine and Scopolamine levels and was found to meet the specification of ≤(b)(4) ppm.

Conclusion:

Due to the limited information provided by the reporter no further investigation is possible at this time of this incident. Standard Homeopathic Co. has established and maintains procedures to ensure product quality.

COMPLAINT #: 2646

TAKEN BY: EDYTA FRACKIEWICZ

DATE OF COMPLAINT: 08/27/2015

PRODUCT: HYLAND'S BABY NIGHTTIME TEETHING TABLETS

ITEM CODE: BTNT----T135

SIZE: 135 TABS

LOT NO.: N/A

REPORTER: (b) (6)

ADDRESS: N/A

N/A

CITY: N/A

STATE: N/A

COUNTRY: USA

ZIP CODE: N/A

PHONE #: N/A

E-MAIL: N/A

NATURE OF COMPLAINT:

CUSTOMER POSTED THE FOLLOWING (b) (6) POST IN RESPONSE TO A BABY NIGHTTIME TEETHING TABLETS POST AND DID NOT CONTACT HYLAND'S DIRECTLY TO PROVIDE MORE INFORMATION: HAS ANYONE HAD ANY ISSUES WITH HIGH FEVER AFTER THESE TABLETS? I GAVE MY SON TABLETS AND SHORTLY AFTERWARDS HE STARTED VOMITING AND HIS TEMP WENT UP TO 104. THE DOCTOR DOESN'T KNOW WHAT'S WRONG. THEY SAW WAX BUILD UP IN HIS EAR, SO THEY LABELED IT AS AN EAR INFECTION, BUT THEY SAW NO ACTUAL INFECTION.

NDARD PATHIC USA SINCE 1903

Serious Adverse Event
SAE-0045-2015

Product in Inventory:

The reporter only provided the product name, Hyland's Baby Nighttime Teething Tablets (BTNT) but no lot number, location of purchase or date of purchase for the units involved.

Review of Records:

Without the lot number a review of the batch records is not possible.

Retention Samples:

No retention samples were inspected because without the lot number of the products a review is not possible.

Other investigations:

With no lot number for the units involved a review the customer complaints and Deviation systems is not possible. However a review of the customer complaint system was performed and it did reveal that in the last twelve months that there have been eight (8) Adverse Events (AE) which also included seven (7) Serious Adverse Events (SAE) reported for Hyland's Baby Nighttime Teething Tablets (BTNT). The reports were reviewed and there does not appear to be any trend. We will continue to monitor future reports for any possible trends.

Although the BTNT lot number cannot be determined Standard Homeopathic Company does submit all Baby Nighttime Teething lots for atropine, scopolamine and CBOT testing. The results for Clostridia botulinum have been "negative" and the total Atropine and Scopolamine levels and was found to meet the specification of ≤ (b)(4) ppm.

Conclusion:

Due to the limited information provided by the reporter no further investigation is possible at this time of this incident. Standard Homeopathic Co. has established and maintains procedures to ensure product quality.

COMPLAINT #: 2644

TAKEN BY: EDYTA FRACKIEWICZ

DATE OF COMPLAINT: 08/29/2015

PRODUCT: HYLAND'S BABY NIGHTTIME TEETHING TABLETS

ITEM CODE: BTNT----T135

SIZE: 135 TABS

LOT NO.: N/A

REPORTER: (b) (6)

ADDRESS: N/A

N/A

CITY: N/A

STATE: N/A

COUNTRY: USA

ZIP CODE: N/A

PHONE #: N/A

E-MAIL: N/A

NATURE OF COMPLAINT:

CUSTOMER POSTED THE FOLLOWING MESSAGE ON (b) (6) AND DID NOT CONTACT HYLAND'S TO PROVIDE MORE INFORMATION: I'M ACTUALLY VERY GLAD I CAME ACROSS THIS. A FEW MONTHS BACK I BROUGHT MY SON IN FOR WHAT I THOUGHT WAS SEIZURES. AROUND THAT SAME TIME HE WAS USING THIS SAME PRODUCT AND ONCE WE STOPPED GIVING TO HIM, EVERYTHING STOPPED AND THERE WAS NO NEED FOR TESTS. HE'S BEEN PERFECTLY FINE EVER SINCE WE STOPPED USING HYLANDS TABLETS. BUT I NEVER THOUGHT THAT THEY COULD BE THE CAUSE.

11516357-01-00-04

VDARD ATHIC SA SINCE 1903

Serious Adverse Event
SAE-0043-2015

Product in Inventory:

The reporter only provided the product name, Hyland's Baby Nighttime Teething Tablets (BTNT) but no lot number, location of purchase or date of purchase for the units involved.

Review of Records:

Without the lot number a review of the batch records is not possible.

Retention Samples:

No retention samples were inspected because without the lot number of the products a review is not possible.

Other investigations:

With no lot number for the units involved a review the customer complaints and Deviation systems is not possible. However a review of the customer complaint system was performed and it did reveal that in the last twelve months that there have been six (6) Adverse Events (AE) which also included five (5) Serious Adverse Events (SAE) reported for Hyland's Baby Nighttime Teething Tablets (BTNT). The reports were reviewed and there does not appear to be any trend. We will continue to monitor future reports for any possible trends.

Although the BTNT lot number cannot be determined Standard Homeopathic Company does submit all Baby Nighttime Teething lots for atropine, scopolamine and CBOT testing. The results for Clostridia botulinum have been "negative" and the total Atropine and Scopolamine levels and was found to meet the specification of ≤(b)(4) ppm.

Conclusion:

Due to the limited information provided by the reporter no further investigation is possible at this time of this incident. Standard Homeopathic Co. has established and maintains procedures to ensure product quality.

COMPLAINT #: 2642

TAKEN BY: EDYTA FRACKIEWICZ

DATE OF COMPLAINT: 08/27/2015

PRODUCT: HYLAND'S BABY TEETHING TABLETS

ITEM CODE: BTET

SIZE: N/A

LOT NO.: N/A

REPORTER: (b) (6)

ADDRESS: N/A

N/A

CITY: N/A

STATE: N/A

COUNTRY: USA

ZIP CODE: N/A

PHONE #: N/A

E-MAIL: N/A

NATURE OF COMPLAINT: CUSTOMER POSTED THE FOLLOWING ON (b) (6) AND DID NOT CONTACT HYLAND'S BY PHONE:
MY SON IS NOW 3 WHEN HE WAS A BABY AND ONLY A FEW MONTHS OLD AND TEETHING I TRIED HYLANDS TEETHING TABLETS. I DIDN'T EVEN USE THE FULL SUGGESTED DOSE AND MY BABY STARTED SEIZING OR SPASMING. I STOPPED IMMEDIATELY. THEN THE SIDE EFFECTS STOPPED. FROM THEN ON I ONLY USED FROZEN PACIFIERS TO SOOTH HIS TEETHING. I AM CONVINCED THOSE TABLETS WERE THE CAUSE AS HE IS A PERFECT LITTLE BOY. AND HAS NEVER DONE THAT BEFORE OR AFTER I STOPPED THOSE.

Adverse Event

SAE-0041-2015

Product in Inventory:

The reporter only provided the product name, Hyland's Baby Teething Tablets (BTET)) but no lot number, location of purchase or date of purchase for the units involved.

Review of Records:

Without the lot number a review of the batch records is not possible.

Retention Samples:

No retention samples were inspected because without the lot number of the products a review is not possible.

Other investigations:

With no lot number for the units involved a review the customer complaints and Deviation systems is not possible. However a review of the customer complaint system was performed and it did reveal that in the last twelve months that there have been one hundred thirty-six (136) Adverse Events (AE) which also included fifty (50) Serious Adverse Events (SAE) reported for Hyland's Baby Teething Tablets (BTET). The reports were reviewed and there does not appear to be any trend. We will continue to monitor future reports for any possible trends.

Although the BTET lot number cannot be determined Standard Homeopathic Company does submit all Baby Teething lots for atropine, scopolamine and CBOT testing. The results for Clostridia botulinum have been "negative" and the total Atropine and Scopolamine levels and was found to meet the specification of ≤ (b)(4) ppm.

Conclusion:

Due to the limited information provided by the reporter no further investigation is possible at this time of this incident. Standard Homeopathic Co. has established and maintains procedures to ensure product quality.

MOTHER REPORTED ON THE NEWS STATION (b) (6) IN (b) (6) THAT CHILD TOOK ONE DOSE OF THE HYLAND'S TEETHING TABLETS AND WAS OFF, NOT REALLY ACTING HIMSELF, SORT OF OUT OF IT AND THEN HE STARTED VOMITING. HE STARTED TURNING COLORS, STOPPED BREATHING AND HIS EYES WERE ROLLING IN THE BACK OF HIS HEAD. HIS PUPILS WERE LIKE MARBLES WITH BIG BLACK EYES. CHILD WAS TAKEN BY AMBULANCE TO A HOSPITAL, EXAMINED, AND SYMPTOMS RESOLVED.

NDARD PATHIC USA SINCE 1903

Serious Adverse Event
SAE-0050-2015

Product in Inventory:

The reporter only provided the product name, Hyland's Teething Tablets (TEET) but no lot number, location of purchase or date of purchase for the units involved.

Hyland's Teething Tablets (TEET) was subject to an SHC recall and withdrawn from the market in 2010.

Review of Records:

Without the lot number a review of the batch records is not possible.

Retention Samples:

No retention samples were inspected because without the lot number of the products a review is not possible.

Other investigations:

With no lot number for the units involved a review the customer complaints and Deviation systems is not possible, additionally TEET was withdrawn from the market in 2010. Hyland's Baby Teething (BTET) is the new formulation that was released to the market after the TEET was withdrawn.

A review of the customer complaint system was performed and it did reveal that in the last twelve months that there have been nine (9) Adverse Events (AE) which also included eight (8) Serious Adverse Events (SAE) reported for Hyland's Teething Tablets (TEET). The reports were reviewed and there does not appear to be any trend. We will continue to monitor future reports for any possible trends.

Conclusion:

Due to the limited information provided by the reporter no further investigation is possible at this time of this incident. Standard Homeopathic Co. has established and maintains procedures to ensure product quality.

COMPLAINT #: 2650

TAKEN BY: EDYTA FRACKIEWICZ

DATE OF COMPLAINT: 09/02/2015

PRODUCT: HYLAND'S BABY TEETHING TABLETS

ITEM CODE: BTET----T135

SIZE: 135 TABS

LOT NO.: A43515

REPORTER: (b) (6)

ADDRESS: N/A

N/A

CITY: N/A

STATE: (b) (6)

COUNTRY: USA

ZIP CODE: N/A

PHONE #: (b) (6)

E-MAIL:

NATURE OF COMPLAINT:

CUSTOMER SENT THE FOLLOWING E-MAIL MESSAGE: I JUST READ YOUR UPDATED RECALL ARTICLE & AS A NEW MOTHER OF A LITTLE GIRL THAT IS NOW MY LIFE, I BEG YOU TO PUT A WARNING LABEL ON YOUR PRODUCT! LAST WEEK I BEGAN GIVING MY ALMOST 5 MONTH OLD YOUR TEETHING TABLETS. ON TUESDAY, I GAVE HER ONE DOSE AND WITHIN 2 HOURS SHE STOPPED BREATHING. ON (b) (6) I GAVE HER ANOTHER DOSE AND SHE HAD 3 SEIZING EPISODES WITHIN 15 MINS! WE HAD TO RUSH HER TO THE HOSPITAL. AFTER SEVERAL TESTS, DOCTOR'S COULD NOT EXPLAIN WHY SHE HAD THE EPISODES. I'M NOT ASKING YOUR COMPANY TO REMOVE THE PRODUCT, AS MANY CHILDREN I KNOW HAVE TAKEN THE TABLETS WITH NO REACTION. I'M JUST BEGGING TO PUT A WARNING LABEL ON THEM IN CASE CHILDREN DO HAVE EPISODES, IT WILL CLICK FOR PARENTS TO DISCONTINUE THE USE OF THEM. IMAGINE IF IT WAS YOUR CHILD....
CUSTOMER RESPONDED ON 9/3/2015 WITH THE FOLLOWING INFORMATION: I'M NOT SURE WHERE TO LOCATE THE LOT #. I'M SEEING 2 NUMBERS IN THE BOTTLE. ONE IS DARK BLACK BOLD A43515. ANOTHER ONE READS NDC 54973-3127-1.
09/04/15 F/U BY PHONE: NKA. NO FAMILY HX OF SEIZURES. NO FEVER, NO ILLNESS. SEIZURES HAVE STOPPED WHEN TABLETS WERE STOPPED. DOCTOR COULD NOT FIND A REASON FOR THE SEIZURES. TAKEN TO THE ER AND RELEASED. NO PREEXISTING CONDITIONS.

Serious Adverse Event
SAE-0049-2015

Product in Inventory:

No (0) units of Hyland's Baby Teething Tablets (BTET), lot # A43515, are currently in the Standard Homeopathic Co. (SHC) warehouse. All other units of the (b) (4) units have been distributed.

Review of Records:

The Hyland's Baby Teething Tablets lot # A43515 associated manufacturing and packaging records were reviewed and did not reveal any issues.

The Quality Control analysis was reviewed and indicated all results, including microbial, were within specification for Hyland's Baby Teething Tablets lot # A43515. The Baby Teething bulk lot # 125412 was tested for total Atropine and Scopolamine and the results were with in specification of ≤ (b) (4) ppm.

Retention Samples:

A visual inspection of the retention samples was conducted and no issues were noted with the packaging of the products. The inspection also included a visual inspection of the contents of the bottle and it was confirmed that it matched the specifications.

The inspection did not yield any results that may be related to this incident.

Other investigations:

A review of the Deviation system was conducted and no Deviations were reported related to this lot of product. Of the units manufactured three other complaints (CC-0337-2015, CC-0434-2015 & CC-0578-2015) have been received for Hyland's Baby Teething Tablets lot # A43515. The complaints were reviewed and they do not appear to be related. We will continue to monitor our reported incidents for potential trends.

Conclusion:

The investigation did not reveal any issues with the manufacturing or packaging processes for these lots of Hyland's Baby Teething Tablets lot # A43515.

Manufacture and processing occurred within established procedures to ensure product quality.

The Hyland's Baby Teething Tablets lot # A68015 associated manufacturing and packaging records were reviewed and did not reveal any issues.

The Quality Control analysis was reviewed and indicated all results, including microbial, were within specification for Hyland's Baby Teething Tablets lot # A68015. The Baby Teething bulk lot # 125644 was tested for total Atropine and Scopolamine and the results were with in specification of ≤(b) (4) ppm.

Retention Samples:

A visual inspection of the retention samples was conducted and no issues were noted with the packaging of the products. The inspection also included a visual inspection of the contents of the bottle and it was confirmed that it matched the specifications.

The inspection did not yield any results that may be related to this incident.

Other investigations:

A review of the Deviation system was conducted and no Deviations were reported related to this lot of product. Of the units manufactured Two other complaints (CC-0612-2015 & CC-0672-2015) have been received for Hyland's Baby Teething Tablets lot # A68015. The complaints were reviewed and they do not appear to be related. We will continue to monitor our reported incidents for potential trends.

Conclusion:

The investigation did not reveal any issues with the manufacturing or packaging processes for these lots of Hyland's Baby Teething Tablets lot # A68015.

Manufacture and processing occurred within established procedures to ensure product quality.

SAE-0051-2015

Product in Inventory:

No (0) units of Hyland's Baby Teething Tablets (BTET), lot # B00215, are currently in the Standard Homeopathic Co. (SHC) warehouse. All other units of the (b) (4) units have been distributed.

Review of Records:

The Hyland's Baby Teething Tablets lot # B00215 associated manufacturing and packaging records were reviewed and did not reveal any issues.

The Quality Control analysis was reviewed and indicated all results, including microbial, were within specification for Hyland's Baby Teething Tablets lot # B00215. The Baby Teething bulk lot # 126373 was tested for total Atropine and Scopolamine and the results were with in specification of ≤(b) (4) ppm.

Retention Samples:

A visual inspection of the retention samples was conducted and no issues were noted with the packaging of the products. The inspection also included a visual inspection of the contents of the bottle and it was confirmed that it matched the specifications.

The inspection did not yield any results that may be related to this incident.

Other investigations:

A review of the Deviation system was conducted and no Deviations were reported related to this lot of product. Of the units manufactured no other complaints have been received for Hyland's Baby Teething Tablets lot # B00215.

Conclusion:

The investigation did not reveal any issues with the manufacturing or packaging processes for these lots of Hyland's Baby Teething Tablets lot # B00215.

Manufacture and processing occurred within established procedures to ensure product quality.

Case 14860

SECTION I: **COMPLAINT**

COMPLAINT #: 2655

TAKEN BY: EDYTA FRACKIEWICZ

DATE OF COMPLAINT: 09/23/2015

PRODUCT: HYLAND'S BABY TEETHING GEL

ITEM CODE: TGEL—U0.5Z

SIZE: 0.5 OZ.

LOT NO.: 126288

REPORTER: (b) (6)

ADDRESS: N/A

N/A

CITY: N/A

STATE: (b) (6)

COUNTRY: USA

ZIP CODE: N/A

PHONE #: (b) (6)

E-MAIL: N/A

NATURE OF COMPLAINT:
DOCTOR STATED THAT 4 MONTH 10 DAY OLD PATIENT WAS ADMITTED TO THE HOSPITAL FOR SEIZURES THAT DEVELOPED APPROXIMATELY 1.5 TO 2 WEEKS AGO. WAS ADMITTED AND THEN DISCHARGED HOME AND CONTINUED TO HAVE BREAKTHROUGH SEIZURES. FINALLY HAS STOPPED HAVING SEIZURES DUE TO PHENOBARB USED AS AN ANTICONVULSANT. PARENTS RELATED THAT THEY HAVE BEEN USING THE HYLAND'S BABY TEETHING GEL FREQUENTLY DURING THE TIME THE PATIENT HAS HAD THE SEZIURES. HE HAS HEARD ABOUT THE RECALL WITH THE TEETHNG TABLETS AND WANTS TO KNOW IF THERE ARE ANY ABNORMALITIES WITH THE TEETHING GEL. SEIZURE DIAGNOSED AS TONIC CLONIC SEIZURES WITH RIGHT AFFECTING MORE THAN LEFT.

dverse Event
SAE-0054-2015

Product in Inventory:

No units of Hyland's Baby Teething Gel (TGEL), lot #126288, are currently in the Standard Homeopathic Co. (SHC) warehouse. The entire lot, (b)(4) units, has been distributed.

Review of Records:

The TGEL lot # 126288 was manufactured using bulk lot # 126288. The associated manufacturing and packaging records were reviewed and did not reveal any issues.

The Certificate of Analysis was reviewed and indicated all results, including Micro, were within specification for Hyland's Baby Teething Gel lot # 126288. In addition it was tested for Total Atropine and Scopolamine levels and was found to meet the specification of ≤(b)(4) ppm.

Retention Samples:

A visual inspection of the retention samples was conducted and no issues were noted with the packaging of the products. The inspection also included a visual inspection of the contents of the bottle and it was confirmed that it matched the specifications.

The inspection did not yield any results that may be related to this incident.

Other investigations:

A review of the Deviation system was conducted and no Deviations were reported related to this lot of product.

Of the units manufactured two other complaints (CC-0596-2015 & CC-0701-2015) have been received for Hyland's Baby Teething Gel lot # 126288. The complaints were reviewed and they do not appear to be related. SHC will continue to monitor reports for trends.

Conclusion:

The investigation did not reveal any issues with the manufacturing or packaging processes for these lots of Hyland's Baby Teething Gel lot # 126288.

Manufacture and processing occurred within established procedures to ensure product quality.

Form # VD1

11614940-01-00-04

NDARD PATHIC USA SINCE 1903

Serious Adverse Event
SAE-0055-2015

Product in Inventory:

The reporter only provided the product name, Hyland's Baby Teething Tablets (BTET) but no lot number, location of purchase or date of purchase for the units involved.

Review of Records:

Without the lot number a review of the batch records is not possible.

Retention Samples:

No retention samples were inspected because without the lot number of the products a review is not possible.

Other investigations:

With no lot number for the units involved a review the customer complaints and Deviation systems is not possible. However a review of the customer complaint system was performed and it did reveal that in the last twelve months that there have been one hundred thirty-six (136) Adverse Events (AE) which also included fifty-one (51) Serious Adverse Events (SAE) reported for Hyland's Baby Teething Tablets (BTET). The reports were reviewed and there does not appear to be any trend. We will continue to monitor future reports for any possible trends.

Although the BTET lot number cannot be determined Standard Homeopathic Company does submit all Baby Teething lots for atropine, scopolamine and *Clostridium botulinum* testing. The total Atropine and Scopolamine levels was found to meet the specification of ≤ (b)(4) ppm and *Clostridium botulinum* testing was negative.

Conclusion:

Due to the limited information provided by the reporter no further investigation is possible at this time of this incident. Standard Homeopathic Co. has established and maintains procedures to ensure product quality.

My 6 month was given both hylands teething tablets and the gel. A few days later she started to displays clusters of a jerking movements at different times throughout the day. After visiting the emergency, her primary doctor, another primary doctor and calling 911 I finally found a hospital with doctors who knew what my daughter was experiencing. She has been experiencing what is known as infantile spasms or west syndrome.

B.6. **Relevant Tests/Laboratory Data, Including Dates** *(continued)*

My 6 month old was admitted into the hospital on (b) (6) She was given and eeg and diagnosed with infantile spasms on the morning of (b) (6) Later that day (b) (6) (b) (6) she had an MRI which came back normal. It is (b) (6) and we are still in the hospital waiting for blood and urine test results

Serious Adverse Event
SAE-0057-2015

Product in Inventory:

The reporter only provided the product name, Hyland's Baby Teething Tablets (BTET) but no lot number, location of purchase or date of purchase for the units involved.

Review of Records:

Without the lot number a review of the batch records is not possible.

Retention Samples:

No retention samples were inspected because without the lot number of the products a review is not possible.

Other investigations:

With no lot number for the units involved a review the customer complaints and Deviation systems is not possible. However a review of the customer complaint system was performed and it did reveal that in the last twelve months that there have been one hundred thirty-nine (139) Adverse Events (AE) which also included fifty-four (54) Serious Adverse Events (SAE) reported for Hyland's Baby Teething Tablets (BTET). The reports were reviewed and there does not appear to be any trend. We will continue to monitor future reports for any possible trends.

Although the BTET lot number cannot be determined Standard Homeopathic Company does submit all Baby Teething lots for atropine, scopolamine and *Clostridium botulinum* testing. The total Atropine and Scopolamine levels was found to meet the specification of ≤ (b)(4) ppm and *Clostridium botulinum* testing was negative.

Conclusion:

Due to the limited information provided by the reporter no further investigation is possible at this time of this incident. Standard Homeopathic Co. has established and maintains procedures to ensure product quality.

E-MAIL: N/A

NATURE OF COMPLAINT: CUSTOMER (MOTHER) CALLED TO REPORT HER 4 MONTH OLD CHILD'S FACE BECAME FLUSHED RED AND THAT THE CHILD WAS HARDLY BREATHING AFTER GIVING THE CHILD TWO (2) OF THE HYLAND'S BABY TEETHING TABLETS. MOTHER STATES SHE BROUGHT THE CHILD TO THE HOSPITAL (b) (6) WHERE CHILD WAS ADMITTED FOR FURTHER EVALUATION. WHEN I ASKED HOW THE CHILD WAS DOING, SHE HESITATED, AND DID NOT RESPOND. MOTHER STATES THE CHILD'S DOCTOR TESTED THE TABLETS TODAY AND INFORMED HER THE TABLETS CONTAINED TWICE THE AMOUNT OF BELLADONNA STATED ON THE LABEL.
MOTHER ALSO REPORTS VIEWING A VIDEO POSTED ON THE FDA WEBSITE WHERE THE RISK AND DANGERS OF THE TEETHING TABLETS WERE DISCUSSED. I EXPLAINED THE FDA VIDEO WAS PREPARED AND LAUNCHED IN 2010 DURING THE TIME OF THE RECALL AND THAT IT IS NOT CURRENT INFORMATION. REGARDLESS OF MY EXPLANATION, SHE INSISTED THE VIDEO WAS CURRENT AND THAT THE FDA TESTED THE TEETHING TABLETS LAST MONTH AND FOUND ISSUES WITH IT. CUSTOMER REFUSED TO PROVIDE ANY ADDITIONAL INFORMATION INCLUDING HER ADDRESS, NAME OF CHILD, PRODUCT INFORMATION, NAME OF HOSPITAL, ETC. CUSTOMER STATED I'D HAVE TO OBTAIN THAT INFORMATION FROM HER LAWYERS.
SHE WANTS TO KNOW WHY THE PRODUCT IS STILL ON THE SHELF BEING SOLD AND WANTS TO SPEAK WITH A MEMBER OF OUR LEGAL TEAM OR THE OWNER OF THE COMPANY.

Individual Case Safety Report

11683168-01-00-04

STANDARD 1903

vent

The reporter only provided the product name, Hyland's Baby Teething Tablets (BTET) but no lot number, location of purchase or date of purchase for the units involved.

Review of Records:

Without the lot number a review of the batch records is not possible.

Retention Samples:

No retention samples were inspected because without the lot number of the products a review is not possible.

Other investigations:

With no lot number for the units involved a review the customer complaints and Deviation systems is not possible. However a review of the customer complaint system was performed and it did reveal that in the last twelve months that there have been one hundred twenty-five (125) Adverse Events (AE) which also included fifty (50) Serious Adverse Events (SAE) reported for Hyland's Baby Teething Tablets (BTET). The reports were reviewed and there does not appear to be any trend. We will continue to monitor future reports for any possible trends.

Although the BTET lot number cannot be determined Standard Homeopathic Company does submit all Baby Teething lots for atropine, scopolamine and *Clostridium botulinum* testing. The total Atropine and Scopolamine levels was found to meet the specification of ≤ (b)(4) ppm and *Clostridium botulinum* testing was negative.

Conclusion:

Due to the limited information provided by the reporter no further investigation is possible at this time of this incident. Standard Homeopathic Co. has established and maintains procedures to ensure product quality.

MOTHER REPORTED THAT CHILD WAS BREATHING REALLY WEIRD ON (b) (6) OR (b) (6) AND SHE CALLED 911 AND CHILD WAS TAKEN TO THE HOSPITAL. CHILD WAS UNCONSCIOUS WITH A BREATHING TUBE IN THE HOSPITAL AND SHE HAD SEIZURES. A FOLEY CATHETER WAS ALSO PLACED. WAS HOSPITALIZED FOR ONE WEEK. CURRENTLY CHILD IS ON SEIZURE MEDICATION AND HAS A FOLLOW UP APPOINTMENT WITH A NEUROLOGIST. BABY HAD A FEVER OF 102 DEGREES WHEN THE SEIZURES OCCURRED. HOSPITAL ATTRIBUTED SEIZURES TO THE LEVEL AND QUALITY OF CARE THE CHILD WAS RECEIVING AT HOME.

NDARD
PATHIC
USA SINCE 1903

.dverse Event
SAE-0060-2015

Product in Inventory:

No (0) units of Hyland's Baby Teething Tablets (BTET), lot # A76715, are currently in the Standard Homeopathic Co. (SHC) warehouse. All other units of the (b) (4) units have been distributed.

Review of Records:

The Hyland's Baby Teething Tablets lot # A76715 associated manufacturing and packaging records were reviewed and did not reveal any issues.

The Quality Control analysis was reviewed and indicated all results, including microbial, were within specification for Hyland's Baby Teething Tablets lot # A76715. The Baby Teething bulk lot # 126005 was tested for total Atropine and Scopolamine and the results were with in specification of ≤(b) (4) ppm.

Retention Samples:

A visual inspection of the retention samples was conducted and no issues were noted with the packaging of the products. The inspection also included a visual inspection of the contents of the bottle and it was confirmed that it matched the specifications.

The inspection did not yield any results that may be related to this incident.

Other investigations:

A review of the Deviation system was conducted and no Deviations were reported related to this lot of product. Of the units manufactured no other complaints have been received for Hyland's Baby Teething Tablets lot # A76715.

Conclusion:

The investigation did not reveal any issues with the manufacturing or packaging processes for these lots of Hyland's Baby Teething Tablets lot # A76715.

Manufacture and processing occurred within established procedures to ensure product quality.

5. Describe Event or Problem (b) (6)

MOTHER CALLED ABOUT HER CHILD WHO HAD A SEIZURE WHEN HE WAS 1 YEAR OLD. SHE HAD BEEN GIVING HIM BABY TEETHING TABLETS A WEEK PRIOR, AS NEEDED FOR TEETHING. HE HAD NO KNOWN FEVER BEFORE THE SEIZURE. IN ALL, SHE USED 10-15 TABLETS, 1 TABLET PER DOSE. THE SEIZURE OCCURRED IN THE MORNING, AND THE LAST DOSE OF PRODUCT WAS GIVEN THE DAY PRIOR. THE MOTHER WAS RESPONDING TODAY AFTER SHE HEARD ON THE NEWS THAT THERE WAS A POSSIBLE CONNECTION BETWEEN TEETHING TABLETS AND SEIZURE/BRAIN BLEEDS.
THE SEIZURE LASTED 30 MINUTES, WITH JERKING AND EYES ROLLING TO THE BACK OF THE HEAD. THE CHILD WAS UNRESPONSIVE TO HIS NAME. HE WAS TAKEN TO THE LOCAL HOSPITAL FOR 4 HOURS WHERE HE WAS STABILIZED, AND GIVEN ROCEPHIN IM. THEY REFERRED HIM TO THE STATE HOSPTIAL WHERE HE WAS ADMITTED FOR 2 DAYS. A FEVER DEVELOPED AFTER THE SEIZURE, AND HE WAS NOT RELEASED UNTIL IT SUBSIDED. THEY DID BLOOD TESTS, MRI AND CHECKED BRAIN ACTIVITY WHILE ASLEEP AND AWAKE. IT WAS ALL NORMAL. THE CAUSE OF THE SEIZURE WAS NOT DETERMINED. THE MOTHER WAS TOLD TO JUST WATCH HIM. HE WAS NOT TAKING ANY MEDICATION, HAD NO KNOWN ALLERGIES, NOR ANY PRE-EXISTING CONDITIONS. HE HAD HIS LAST IMMUNIZATION AT 9 MONTHS.

(Continue on page 3)

6. Relevant Tests/Laboratory Data, Including Dates

HE WAS TESTED FOR BRAIN ACTIVITY WHILE AWAKE AND ASLEEP; GIVEN BLOOD TESTS, MRI AND XRAYS.

Form # VD1

11788548-01-00-05

VDARD ATHIC SA SINCE 1903

Serious Adverse Event
SAE-0063-2015

Product in Inventory:

No (0) units of Hyland's Baby Teething Tablets (BTET), lot # A74414, are currently in the Standard Homeopathic Co. (SHC) warehouse. All units of the lot have been distributed.

Review of Records:

The Hyland's Baby Teething Tablets lot # A74414 associated manufacturing and packaging records were reviewed and did not reveal any issues.

The Quality Control analysis was reviewed and indicated all results, including microbial, were within specification for Hyland's Baby Teething Tablets lot # A74414. The Baby Teething bulk lot # 123797 was tested for total Atropine and Scopolamine and the results were with in specification of ≤(b)(4) ppm.

Retention Samples:

A visual inspection of the retention samples was conducted and no issues were noted with the packaging of the products. The inspection also included a visual inspection of the contents of the bottle and it was confirmed that it matched the specifications.

The inspection did not yield any results that may be related to this incident.

Other investigations:

A review of the Deviation system was conducted and no Deviations were reported related to this lot of product. Of the units manufactured no other complaints have been received for Hyland's Baby Teething Tablets lot # A74414.

Conclusion:

The investigation did not reveal any issues with the manufacturing or packaging processes for these lots of Hyland's Baby Teething Tablets lot # A74414.

Manufacture and processing occurred within established procedures to ensure product quality.

E-MAIL: (b) (6)

NATURE OF COMPLAINT: CUSTOMER POSTED THE FOLLOWING ON (b) (6) AND WOULD NOT CALL HYLAND'S AFTER SEVERAL REQUESTS: DEAR HYLANDS TEETHING TABLETS IM A FIRST TIME AND HAVE A 10 MONTH OLD DAUGHTER. THINKING YOUR PRODUCT WAS SAFE LANDED MY DAUGHTER IN THE HOSPITAL ER. WE HAD A VERY FRIGHTFUL NIGHT THAT ENDED IN AN ER VISIT MANY SLEEPLESS NIGHTS DUE TO POSIONING FROM YOUR TEETHING TABLETS. THE DOCTOR SAID HE WAS AMAZED THAT YOUR PRODUCT IS LABELED SAFE SINCE BELLADONNA IS STILL IN IT. NOTHING CAN REPLACE THE DAYS I SPENT WITH DAUGHTER SEIZING UP FROM YOUR TABLETS. THE FEAR HER FATHER AND I WENT THROUGH. AS A MOM I WILL NEVER TOUCH YOUR PRODUCT AGAIN AND HAVE ALSO BEEN IN CONTACT WITH THE FDA AND POSION CONTROL SINCE SHE COULD HAVE DIED. PLEASE BE HONEST AND ADMIT THE TRUTH BEHIND BELLADONNA AN ACTIVE INGREDIENT WHICH IS MADE FROM THE DEATHLY PLANT KNOW. AS NIGHTSHADE. IT IS SAD PARENTS THINK FALLING ASLEEP INSTANTLY OR THE LITTLE SMALL THINGS ARE TEETHING RELATED AND USE YOUR PRODUCT WHEN ITS THE PRODUCT ITSELF CAUSING PROBLEMS. IM LUCKY ENOUGH TO SAY MY DAUGHTER SHOULD BE ALRIGHT BUT NOW HAS TO SEE NEUROLOGISTS AND MY EXPENSE BECAUSE I READ THE WORD SAFE ON YOUR PRODUCT LABEL AND ONLY 3 TABLETS INTO THE BOTTLE LANDED MY DAUGHTER IN THE HOSPITAL. PS THEY CHECKED HER FOR EVERYTHING AND IT WAS BELLADONNA POISONING. AFTER THE DIAGNOSIS WE STARTED TO DIG AND FOUND THE FDA HAS A VIDEO OUT URGING PARENTS THIS COULD HAPPEN TO THEIR KIDS. ALSO SENT THE FOLLOWING E-MAILS #1: I RECENTLY PURCHASED A BOTTLE OF 125 COUNT FROM FAMILY DOLLAR AND MY DAUGHTER EXPERIENCED SEIZURES SHORTLY AFTER THE THREE TABLETS I GAVE HER ALL THREE WERE GIVEN AT SEPARATE TIMES OVER A 24 HR PERIOD. WE HAVE DOCUMENTATION SHE SUFFERED FROM SEIZURES FROM THE BELLADONNA. IN YOUR PRODUCT WHAT DO YOU PLAN ON DOING TO PREVENT THIS. #2 A REFUND WONT PAY FOR THE BILLS WE HAVE NOW BECAUSE OF THE POSIONING. OR GET THE NEWS OUT THERE YOUR PRODUCT ISNT SAFE. I HAVE ALREADY STARTED MEETING WTH AN ATTORNEY REGUARDING THIS PROBLEM SINCE MY DAUGHTER NOW REQUIRES MEDICAL CARE. I ALREADY KNOW ABOUT BELLADONNA THANKS TO POSION CONTROL AND THE FDA I WAS FORCED TO MEET WITH AFTER ONLY 3 TABLETS OF YOUR PRODUCT

VDARD ATHIC IA SINCE 1903

Serious Adverse Event
SAE-0064-2015

Product in Inventory:

The reporter only provided the product name, Hyland's Baby Teething Tablets (BTET) but no lot number, location of purchase or date of purchase for the units involved.

Review of Records:

Without the lot number a review of the batch records is not possible.

Retention Samples:

No retention samples were inspected because without the lot number of the products a review is not possible.

Other investigations:

With no lot number for the units involved a review the customer complaints and Deviation systems is not possible. However a review of the customer complaint system was performed and it did reveal that in the last twelve months that there have been one hundred and three (103) Adverse Events (AE) which also included forty-seven (47) Serious Adverse Events (SAE) reported for Hyland's Baby Teething Tablets (BTET). The reports were reviewed and there does not appear to be any trend. We will continue to monitor future reports for any possible trends.

Although the BTET lot number cannot be determined Standard Homeopathic Company does submit all Baby Teething lots for atropine, scopolamine and *Clostridium botulinum* testing. The total Atropine and Scopolamine levels was found to meet the specification of ≤ (b)(4) ppm and *Clostridium botulinum* testing was negative.

Conclusion:

Due to the limited information provided by the reporter no further investigation is possible at this time of this incident. Standard Homeopathic Co. has established and maintains procedures to ensure product quality.

5. Describe Event, Problem or Product Use Error

Nine month old son was healthy and up-to-date on shots and doctor visits at the time. Son is teething and parents gave him Hylands Teething Tablets as recommended by a family member. Son was given two tablets and within three hours later he had experienced a seizure. He was unresponsive, parents dialed 911, and child was taken to the ER. He improved and was not admitted to hospital. Doctor ran tests and found nothing. Father is concerned that his son's seizure is related to bella donna in product. He cites youtube video of a NIH case study by the FDA. Son has twin sister & parents monitor all new food introduced to kids for any possible allergic reactions.

B.5. **Describe Event or Problem** *(continued)*

We gave our daughter hylands teething tablets as directed and she is 16 months old and weighs about 25lbs and we noticed her shaking,like a really bad tremble, and it gradually wore off over the next few hours, she slept almost all day for 2 days after that, and I just read online that kids had seizures from it so I wanna get her checked out now,so scheduling an appointment. Just wanted to let someone know because we don't want any other parents to see that, it scared me at first yanno?

B.5. **Describe Event or Problem** *(continued)*

Gave 6 month old son 2 Hylands Teething Tablets aprox 6:30pm (b) (6) Within (b) (6) began to notice odd behavior. Baby is normally crawling and playing with good coordination and just fell over. Started acting drunk, delirious and very uncoordinated. Went to the ER and symptoms correlated with belladonna poisoning. Symptoms have continued for four days. He is getting better but not back to normal. He is continuing to act spacey and exhausted with bursts of strange euphoria. He is very tired but also restless at the same time. Went to the ER a second time and blood work was done. Doctors opinion was the ingredients in the teething tablets were still effecting him.

B.6. **Relevant Tests/Laboratory Data, Including Dates** *(continued)*

B.5. **Describe Event or Problem** *(continued)*

I started giving my baby Hyland's Baby Teething Tablet 2 weeks after he turned 4 months. (b) (6) he had multiple seizures and I took him straight to the Children's Hospital. He had a EEG done for 48 hours, a MRI, and a Spinal Tap. Everything came back normal. He was in the hospital for a week and was not taking the teething medicine. During that week I haven't noticed any more seizures until August 12 when I gave him the teething medicine again. An hour after I gave him the medicine he had 2 seizures.

B.6. **Relevant Tests/Laboratory Data, Including Dates** *(continued)*

He received the Spinal Tap, EEG and MRI.

B.7. **Other Relevant History, Including Preexisting Medical Conditions** *(e.g. allergies, pregnancy, smoking and alcohol use, hepatic/renal dysfunction, etc.) (continued)*

B.5. **Describe Event or Problem** *(continued)*

My daughter is nine months old and experienced symptoms after consuming Hyland's teething tablets. I had been giving her two tablets a day for about five days when I noticed it for the first time. She would suddenly drop her head down and have trouble lifting it back up. She had several episodes, most severely about an hour or two after taking the dose of tablets. She also experienced extreme thirst during/after these episodes and would drink more water or milk in a few hours than she normally drinks most of the day. I now have discovered that these events are tied to the teething tablets and I think it may be an adverse reaction to the belladonna in the tablets. She was getting much less than the recommended daily dose and still had a reaction.

Section A - About the Problem

What kind of problem was it? (Check all that apply)	☑ Were hurt or had a bad side effect (including new or worsening symptoms) ☐ Used a product incorrectly which could have or led to a problem ☐ Noticed a problem with the quality of the product ☐ Had problems after switching from one product maker to another maker
Did any of the following happen? (Check all that apply)	☑ Hospitalization – admitted or stayed longer ☐ Required help to prevent permanent harm (for medical devices only) ☐ Disability or health problem ☐ Birth defect ☐ Life-threatening ☐ Death ☑ Other serious/important medical incident
Date of Death	
Other serious/important medical incident	Severe urticaria in infant
Date the problem occurred	27-Aug-2016

Tell us what happened and how it happened (Include as many details as possible)

My child presented with severe urticaria (b) (6) after he was given baby orajel for 3 days as directed. My child still has severe urticaria and is being treated with prednisolone once a day and Benadryl every four hours.

List any relevant tests or laboratory data if you know them (Include dates)

Blood tests, cbc, pt, ptt,

Section B - About the Products 1 of 1

Name of the product as it appears on the box, bottle, or package (Include as many names as you see)	Orajel Teething swabs		
Name of the company that makes (or compounds) the product	Church & Dwight		
Is the Product Compounded? (Your health professional may be able to help you identify whether the drug was compounded.)			
Is the Product Over-the-Counter?	Yes		
Expiration date	01-Nov-2018		
Lot number	Gp6006		
NDC number			
Strength (for example, 250 mg per 500 ml or 1g)	7.5 % percent	**If Other**	
Quantity	1 Other	**If Other**	
Frequency	4 times a day	**If Other**	
How was it taken or used	Topical		
Date the person first started taking or using the product	17-Aug-2016		
Date the person stopped taking or using the product	19-Aug-2016		
Did the problem stop after the person reduced the dose or stopped taking or using the	No		

product?	
Did the problem return if the person started taking or using the product again?	Doesn't Apply
Do you still have the product in case we need to evaluate it?	Yes

Why was the person using the product? (such as what condition was it supposed to treat)

Teething

Section C - About the Medical Device

Name of medical device	
Name of the company that makes the medical device	
Model #	
Catalog #	
Serial #	
Lot #	
Unique Identifier (UDI) #	
Expiry Date	
Was someone operating the medical device when the problem occurred?	

For implanted medical devices ONLY (such as pacemakers, breast implants, etc.)

Date the implant was put in		**Date the implant was taken out (If relevant)**	

Other identifying information (The model, catalog, lot, serial, or UDI number, and the expiration date, if you can locate them)

Section D - About the Person Who Had the Problem

Person's Initials	(b) (6)
Sex	Male
Age (specify unit of time for age)	5 Month(s)
Date of Birth	
Weight	7.2 kg(s)
Ethnicity (Choose only one)	Not Hispanic/Latino
Race (Choose all that apply)	☐ American Indian or Alaskan Native ☐ Native Hawaiian or Other Pacific Islander ☐ Asian ☑ White ☐ Black or African American

List known medical conditions (Such as diabetes, high blood pressure, cancer, heart disease, or others)

None

Please list all allergies (such as to drugs, foods, pollen or others)

None

List any other important information about the person (such as smoking, pregnancy, alcohol use, etc.)

None

List all current prescription medications and medical devices being used.

List all over-the-counter medications and any vitamins, minerals, supplements, and herbal remedies being used.

B.5. **Describe Event or Problem** *(continued)*

On (b) (6) My daughter (b) (6) had to be rushed to (b) (6) Hospital . She was seizing for approximately 25 minutes, she was unresponsive, cyanotic and gasping for air, upon arrival EMS gave her diazepam IM and she continued to seize while going to the hospital. Diagnosis at the emergency room was Status Epilepticus. The only new Item that was introduced to (b) (6) was the CVS brand Homeopathic theeting tablets. Upon inspection at the emergency room , it was discovered that the CVS pills contained Belladona . Belladona is a highly toxic substance that was once used to poison people. Although the percentagage of Belladona per the label is 0000000003%. There has been no significant clinical testing to verifythat this product is safe for children from 0-3 years of age, as is shown on the label of the CVS product. I have been in touch with CVS , regarding the issue and they referred me to the Manufacturer of the product. The CVS representative stated that they market the product only. The representative also stated that the ingredients of the product are imported from China . As a member of the Law Enforcemnt community , I believe that this product should be inspected to make sure that it is safe for human consumption especially for children .It also states on the box that the ingredients are forgein sources V-30496

B.6. **Relevant Tests/Laboratory Data, Including Dates** *(continued)*
