## 1. EXECUTIVE SUMMARY

MCM Vaccine Company submitted responses to information requests dated June 14, July 16, July 17, and July 23, 2018 on August 21, 2018 (STN 125563/0.38), which included documents pertaining to the D-antigen (b) (4) Calculation Program for the poliomyelitis component of Vaxelis. A statistics review was requested by the product review team on September 21, 2018 to review the (b) (4) calculation algorithm for the D-antigen (b) (4) assay provided by the applicant. This memo focuses on the calculation methods used in the D Antigen (b) (4) Calculation Program for Polio.

Based on the algorithm provided, the (b) (4) analysis for the D-antigen (b) (4) assay appears to be appropriate. There are no further comments.

## 2. REGULATORY BACKGROUND

Vaxelis (formerly (b) (4)) is a hexavalent diphtheria, tetanus, pertussis, poliomyelitis, hepatitis B, and Haemophilus type b vaccine being developed by MCM Vaccine Company. Responses to information requests dated June 14, July 16, July 17, and July 23, 2018 and documents pertaining to the D-antigen (b) (4) Calculation Program for the poliomyelitis component of Vaxelis were submitted by MCM Vaccine Company on August 21, 2018 (STN 125563/0.38).

## 3. SOURCES OF DATA AND OTHER INFORMATION CONSIDERED

### 3.1 Review Strategy

This memo focuses on the algorithm and implementation of the D Antigen (b) (4) Calculation Program for Polio.

### 3.2 Documents that Serve as Basis for the Statistical Review

1. SOP Q\_0268418, "Design Specification for D-antigen (b) (4) Calculation Program for Polio."
2. Response to June 14, 2018 information request.
3. Response to October 15, 2018 information request (STN 125563/0.44)
4. Response to October 24, 2018 information request (STN 125563/0.45)
5. Response to November 27, 2018 information request (STN 125563/0.54)

4. D-ANTIGEN (b) (4) ANALYSIS FOR POLIO
