

FDA FACT SHEET

MAMMOGRAPHY QUALITY STANDARDS ACT (MQSA) CONTRACT PROGRAM

Program Description

- The Mammography Quality Standards Act (MQSA) was signed into law in 1992.
- The Act authorizes FDA to obtain state, local, and territorial assistance in enforcing the MQSA requirements including annual inspections of all certified facilities.
- As part of the Mammography Quality Standards Act (MQSA), Congress mandated annual reporting of adverse actions taken against mammography facilities. Congress stipulated that the report be made available to physicians and the public and that it should include information that is useful in evaluating the performance of mammography facilities nationwide.

Intended Outcomes

- To obtain state and local assistance in the inspection of certified non-federal mammography facilities.
- To document compliance with the mammography quality standards issued under 21 CFR Part 900.
- To ensure facilities that fail accreditation cease providing mammography services.
- To require all facilities to have a system in place to address and resolve complaints.
- To ensure women receive high quality mammography for early breast cancer detection by requiring the establishment of a federal certification and inspection program.

Program Metrics

- Current program funding: 13.29M
- Current number of awards: 43

MQSA Contract Awardees (FY2024)								
Alabama	Alaska	Arkansas	Arizona	California	Colorado	Connecticut	Delaware	Florida
Georgia	Hawaii	Idaho	Kansas	Kentucky	Louisiana	Massachusetts	Maryland	Maine
Michigan	Missouri	Mississippi	Montana	North Carolina	North Dakota	New Hampshire	New Jersey	New Mexico
Nevada	New York	New York City	Ohio	Oregon	Pennsylvania	Puerto Rick	Rhode Island	South Dakota
Tennessee	Utah	Virginia	Vermont	Washington	Wisconsin	West Virginia		

The FDA, an agency within the U.S. Department of Health and Human Services, protects the public health by assuring the safety, effectiveness, and security of human and veterinary drugs, vaccines and other biological products for human use, and medical devices. The agency also is responsible for the safety and security of our nation's food supply, cosmetics, dietary supplements, and products that give off electronic radiation, and for regulating tobacco products.
