32 Diamond CBD - Failed Drug Test

I have not smoked weed in over 6 weeks. I bought a Diamond CBD Full Spectrum cartridge recently and failed a drug test for THC. I also had a false positive for opioids. I haven't taken tramadol in 3 weeks, when I got my cortisone shots, so it's strange that would be an issue.

I cannot say without a doubt Diamond CBD caused my false positives, but I don't know what else would've caused it. I've read some buyer beware posts (after I bought it of course) so I wanted to add to the list of beware posts.
