

Developing Therapies for Primary Mitochondrial Diseases: *Bridging the Gaps*

09.06.19

**8 AM – 4 PM
*Great Room***

Given the complexities of primary mitochondrial diseases and, by extension, the difficulty of designing informative clinical trials in this group of rare diseases, FDA is organizing this scientific symposium with the goal of bringing together academic physicians, FDA regulatory experts, patients advocates, and other interested stakeholders to exchange ideas and advance drug development in this challenging field.
