Thank you to our Supporting Organizations

LUNgevity Foundation

LUNgevity Foundation’s mission is to improve outcomes for people diagnosed with lung cancer. Our goals are three-fold: (1) to accelerate research to patients that is meaningful to them; (2) to empower patients to be active participants in their care and care decisions; and (3) to help remove barriers to access to high quality care.

LUNgevity Foundation has the largest lung cancer survivor network in the country and actively engage with them to identify, understand, and address unmet patient needs. We also have a world class Scientific Advisory Board that guides the programs and initiatives of the organization. For more information, please visit our website: www.lungevity.org.

Ovarian Cancer Research Alliance

Ovarian Cancer Research Alliance (OCRA) is the leading organization in the world fighting ovarian cancer from all fronts, including in the lab and on Capitol Hill, while supporting women and their families.

There are three cornerstones of our mission:

1) Funding Research: OCRA's ongoing investment in the most promising scientific research is funding discoveries, creating new treatments, and hastening desperately needed breakthroughs. 2) Advocating for Patients: We are THE voice for the ovarian cancer community, working with legislators to ensure federal ovarian cancer research and education funding, patient safety, and access to high-quality care are protected on Capitol Hill. 3) Supporting Survivors: Our programs help women navigate an overwhelming diagnosis, supporting patients and their families when and where they need it most. Website: <https://ocrahope.org>

Pancreatic Cancer Action Network

The Pancreatic Cancer Action Network (PanCAN) is dedicated to fighting the world's toughest cancer.

In our urgent mission to save lives, we attack pancreatic cancer on all fronts: research, clinical initiatives, patient services and advocacy.

Our effort is amplified by a nationwide network of grassroots support. We are determined to dramatically improve patient outcomes. Website: <https://www.pancan.org>
