

Considering an Online Pharmacy?

Purchasing medicine online may offer convenience, cost savings and privacy, but many websites selling medicine are unsafe and unlicensed.

Before ordering prescription medicine online, check that your online pharmacy is safe.

Safe Signs

Your online pharmacy is likely safe if it:

Requires doctor's prescription

Has a licensed pharmacist on staff

Has a physical address in the United States

Is licensed by the state pharmacy board

Warning Signs

Beware of purchasing medicine from a website that:

Does not require a doctor's prescription

Does not have a pharmacist on staff

Does not have a U.S. address

Is not licensed by the state pharmacy board

Provides medication that is expired, damaged, looks different or has no expiration date

Offers deep discounts or prices too good to be true
