

# binx health At-home Nasal Swab COVID-19 Sample Collection Kit - for individual shipping

## Instructions for Use - Please read ALL instructions prior to collecting a sample

### Activate the Sample Collection Kit online before use

1 Open and unpack the sample collection kit, placing the contents on a clean surface.

The sample identification label is pre-printed with the activation code.

2 Activate the kit at

[www.mybinxhealth.com/activate](http://www.mybinxhealth.com/activate)

If you are a returning user, log in to your account before activating the kit.

If you do not receive an email notification after activation please contact support at

[support@mybinxhealth.com](mailto:support@mybinxhealth.com)

**Important!** The sample may be rejected if it has not been activated at [mybinxhealth.com/activate](http://mybinxhealth.com/activate) before it is sent to the laboratory.

3 The sample identification label is pre-printed with the activation code.

The label may ask for your name, date of birth, and date, time and timezone you collected your sample. Complete the label with any of the requested information.

4 Apply the label lengthways on the long side of the tube.

### Collect the sample

5 The person collecting the sample should wash their hands thoroughly with soap and water for 20 seconds.

6 Twist the tube cap to remove the swab.

**Important!** Do not touch the swab tip!

7 Insert the soft tip of the swab into the nostril. Insert no more than  $\frac{3}{4}$  of an inch (1.5 cm) for an adult and less than  $\frac{1}{2}$  an inch (1 cm) for younger children.

Sample the nasal membrane by rotating the swab in a circular path against the inside the nostril four (4) times for a total of 15 seconds.

Gently remove the swab.

**Important!** If you are collecting a specimen from a child, be careful not to insert the swab too far into the child's nostril.

8 Repeat using the same swab for the other nostril.

**It is important to collect the sample from both nostrils.**

If, during the collection process, you, or the person you are collecting the sample from, feels any discomfort, stop collecting the sample immediately and contact binx by emailing [support@mybinxhealth.com](mailto:support@mybinxhealth.com) or calling 844-692-4691

9 Without touching the swab tip, place the swab (tip first) into the tube and close securely.

**Return the Sample Collection Kit the same day it was collected**

**Important!** If you are under 18 years of age, please ask your parent or guardian to assist with packaging the sample and arranging for shipment of the Sample Collection Kit to the laboratory.

10 Place the tube containing the swab in the sample bag containing the absorbent pad.

Seal the bag by tearing off the strip and folding the top of the bag over.

11 The person who collected the sample should wash their hands thoroughly with soap and water for 20 seconds.

12 Place the sample bag in the cardboard box and close securely.

13 Place the box inside the return envelope and seal.

14 Return using UPS before the last pickup of the day by going to [wwwapps.ups.com/pickup/schedule](http://wwwapps.ups.com/pickup/schedule) or take the envelope to any UPS access point or store.

For Use Under Emergency Use Authorization

RES-ART-0010 v4.0 | AUG 2021

# binx health At-home Nasal Swab COVID-19 Sample Collection Kit - for individual shipping

## Instructions for Use - Please read ALL instructions prior to collecting a sample

### Before using the kit

Ensure all instructions are carefully followed.

Not following these instructions may lead to incorrect results or rejection of the sample.

#### The Sample Collection Kit contains:

Cardboard shipping box

Sterile swab and tube

Instructions for Use

Sample bag with absorbent pad

Pre-paid return envelope

Sample identification label

### After using the kit, please check that:

You have successfully activated the kit online and received confirmation.

The sample identification label has been placed onto the swab tube and all requested information has been filled out

### Collection of samples

If this sample collection kit is being used to obtain a nasal swab sample from a child 5-13 years of age, the specimen should be collected by a parent or guardian.

For children 14-17 years of age, and for adults, swabs may be self-collected. Self-collection of samples from children 14-17 years of age should be performed under adult supervision.

**This sample collection kit should not be used to collect a sample from a child under the age of five**

### What happens next?

#### Return the sample via UPS

UPS may stop collecting at 4pm, or earlier, so check before you begin the collection process.

Send the activated, completed kit using the pre-packaged printed return label.

#### The sample will be processed

The laboratory performs quality checks and processes the sample. You will be contacted if there are any issues.

#### You will be able to access the result

The results will be reviewed and then securely transmitted to your personal binx dashboard.

Log in to [mybinxhealth.com/login](https://mybinxhealth.com/login) to review the results.

If the test result is positive, a licensed healthcare professional will reach out to you with next steps.

### The sample may be rejected if:

**The sample kit is not activated before being returned to the laboratory.**

**The sample is not sent on the same day it was collected.**

**The sample is incorrectly labeled or there is missing information.**

**The sample is incorrectly packaged.**

This product has not been FDA cleared or approved, but has been authorized for emergency use by FDA under an EUA;

This product has been authorized only for the home collection and maintenance of anterior nasal swab specimens as an aid in detection of nucleic acid from SARS-CoV-2, not for any other viruses or pathogens; and

The emergency use of this product is only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of medical devices under Section 564(b)(1) of the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. § 360bbb-3(b)(1), unless the declaration is terminated or authorization is revoked sooner.

**Got any questions about the collection process? Contact binx at [support@mybinxhealth.com](mailto:support@mybinxhealth.com) or call 844-692-4691**

**Please turn over for step by step instructions to collect your sample**
