

# Topics for VRBPAC Discussion

---

Following the scheduled presentations and open public hearing, the VRBPAC will be asked to discuss and provide input on the following topics (no voting questions):

- What considerations should inform strain composition decisions to ensure that available COVID-19 vaccines continue to meet public health needs, e.g.:
  - Role of VRBPAC and FDA in coordinating strain composition decisions
  - Timelines needed to implement strain composition updates
  - Harmonization of strain composition across available vaccines
- How often should the adequacy of strain composition for available vaccines be assessed?
- What conditions would indicate a need for updated COVID-19 vaccine strain composition, and what data would be needed to support a decision on a strain composition update?
- What considerations should guide the timing and populations for use of additional COVID-19 vaccine booster doses?
