

Post hoc analysis of a phase 2 clinical trial

Demonstrated synergy: superior efficacy vs the aggregated results of two monotherapies³

More patients experienced treatment success¹ with DUOBRII Lotion than the aggregated success rates of both monotherapies³

DUOBRII Lotion exceeded the clinical definition of synergy by 31.7% at 8 weeks^{3,4}

Synergy describes when the combined action of two agents is greater than the sum of the efficacy of the individual agents³

Study design 

¹Treatment success was defined as at least a 2-grade improvement from baseline in the IGA score, and a score of "clear" or "almost clear" (primary endpoint at week 8).²
