Concentration values greater than or equal to 10 are reported to the nearest integer; concentration values less than 10 are reported with two significant figures

Conc. Concentration
 Min. Minimum
 Max. Maximum
 Std. Dev. Standard Deviation
 Not app. Not applicable

The third column in this table, titled "Number of Samples" reflects the total number of samples collected per TDS food. For example, For TDS food 1, "Milk, whole, fluid" 27 samples were collected for the FY2018-2020 reporting cycle. This value is repeated for each analyte per Section 508 compliance, however, the font is black once, and white for all repeats, in an effort to ensure a visual reader does not assume that for TDS food 1, "milk, whole, fluid" there were 27 samples collected per analyte.
