Re: GRAS Notice No. GRN 001035

Dear Dr. Röhrig:

We are issuing a revised copy of the response letter for GRN 001035. The original letter for this GRAS notice was signed on January 19, 2023. In an email dated February 2, 2023, Glycom A/S (Glycom) noted an error in our original response letter. This error originated from the GRAS notice that Glycom submitted, which stated that the production strain is *Escherichia coli* K-12 DH1 MDO strain MP2176. Glycom's email noted that the correct strain is *Escherichia coli* K-12 DH1 MDO strain MP2173b, which is deposited in the Deutsche Sammlung von Mikroorganismen und Zellkulturen (DSMZ) strain collection in Braunschweig, Germany, under deposition number DSM 33417.

As a follow up to this email, we revised the January 19, 2023, response letter to correct the strain name in paragraphs 4 and 5 of the original response letter.

If you have any questions, please contact me by email at rachel.morissette@fda.hhs.gov or by telephone at 240-402-1212.

Sincerely,

Rachel
