Report of Funded and Unfunded Projects

Past Funding

2008-2009	Effects of Losartan vs Atenolol on Aortic Stiffness and Diastolic Function in Adults with Marfan Syndrome. Lead Researcher
2008-2010	ACC Merck Fellowship in Cardiovascular and Metabolic Disease Effects of Losartan vs Atenolol on Aortic Stiffness and Diastolic Function in Adults with Marfan Syndrome. National Marfan Foundation Victor McKusick Award PI (\$75,000)
2012-2015	Surveillance of Adolescent and Adult Congenital Heart Defects Center for Disease Control, Massachusetts Department of Public Health Site PI (\$180,000) The major goal of this study is to assess the incidence of CHD in adolescents and adults in Massachusetts, and where they are located, which type of physicians care for them, and study a subset for pregnancy outcomes.
2017-2019	ACHD Patient Reported Outcomes Measures Baylor School of Medicine

Current Funding

2016-	Rubato Trial
-------	--------------

Actelion Pharmaceuticals: Janssen.
Site PI : Macitentan in Fontan physiology

- 2019- MGH Biobank
Genetics associated with Coarctation of the aorta and hypertensive and HF phenotypes
- 2019- Boston ECG Project: EKG Screening Registry for high school students examining the incidence of CHD diagnosis based on community screening models.

Additional Research Projects

- 2010-2022 MGH PI: Longitudinal Care in Adults with Congenital Heart Disease
Outcomes of individuals with anomalous coronary arteries with and without unroofing procedures
- 2010-2022 Coarctation exercise physiology predicts outcomes post repair: Long term registry
Study of a novel coarctation exercise protocol pre and post coarctation surgical and percutaneous intervention
- 2011-2022 HEART (Helping Emerging Adolescents Reconcile Transition), collaboration with Adolescent Psych Dept
Assessing psychiatric diagnoses and association with visit compliance rates and complexity of disease process in ACHD with quality improvement initiative for social work referral and engagement in ACHD
- 2018-2022 Genetic Predisposition to Long Term Outcomes in Coarctation of the Aorta: Assessment of whole exome sequencing and arterial stiffness measures in Coarctation patients with persistent hypertension, early atherosclerotic cardiovascular disease and heart failure preserved ejection fraction (IRB and Grant Submission in process).
- 2017-8 Use of transcatheter pulmonary valve replacement in patients with congenital heart disease- a report from the IMPACT registry (00034impt). Sponsored by the American College of Cardiology.
- 2019 Quality Improvement Project in Turner Syndrome and Coarctation: Use of bluetooth enabled home blood pressure monitoring for early diagnosis of hypertension and more efficient uptitration of antihypertensive medications
- 2020 Telemedicine for Adult Congenital Heart Disease Care in the Community: Quality improvement initiative using virtual visits, image transfer and review, teleclinics, digital stethoscopes to move ACHD care from episodic to continuous.
- 2020 ACHD SMART: Randomized parallel crossover design trial of virtual resiliency training in adults with CHD and health related anxiety.
- 2020 Equity in Telemedicine: American Association of Black Cardiologists
