## Guidance for Industry<sup>1</sup>

### 180-Day Exclusivity When Multiple ANDAs are Submitted on the Same Day

This guidance represents the Food and Drug Administration's (FDA's) current thinking on this topic. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. You can use an alternative approach if the approach satisfies the requirements of the applicable statutes and regulations. If you want to discuss an alternative approach, contact the FDA staff responsible for implementing this guidance. If you cannot identify the appropriate FDA staff, call the appropriate number listed on the title page of this guidance.

#### I. INTRODUCTION

This guidance is intended to provide information on how the Food and Drug Administration (FDA) intends to determine eligibility for 180-day generic drug exclusivity when, on the same day, more than one applicant submits an abbreviated new drug application (ANDA) for the same drug under section 505(j) of the Federal Food, Drug, and Cosmetic Act (Act) containing a paragraph IV certification to a listed patent, and no paragraph IV certification to the patent was submitted on any previous day. To date, FDA's exclusivity decisions have involved applications or amendments submitted on different days. This guidance explains why and how the Agency intends to apply a *multiple first applicant* approach.

FDA's guidance documents, including this guidance, do not establish legally enforceable responsibilities. Instead, guidances describe the Agency's current thinking on a topic and should be viewed only as recommendations, unless specific regulatory or statutory requirements are cited. The use of the word *should* in Agency guidances means that something is suggested or recommended, but not required.

---

<sup>1</sup> This guidance has been prepared by the Office of Generic Drugs (OGD) in the Center for Drug Evaluation and Research (CDER) in cooperation with the Office of Regulatory Policy (ORP) and the Office of the Chief Counsel (OCC) at the Food and Drug Administration.

## *Contains Nonbinding Recommendations*

### 36 **II. BACKGROUND**

37  
38 The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. No. 98-417) (the  
39 Hatch-Waxman Amendments) amended the Federal Food, Drug, and Cosmetic Act (the Act).  
40 The Hatch-Waxman Amendments created section 505(j) of the Act (21 U.S.C. 355(j)). Section  
41 505(j) established the ANDA approval process, which allows lower-priced generic versions of  
42 previously approved innovator drugs to be approved and brought on the market.

43  
44 An innovator drug applicant must include in its new drug application (NDA) information about  
45 any patents that claim the drug product that is the subject of the NDA, or the use of such drug  
46 product (21 U.S.C. 355(b)(1) and (c)(2)). The FDA publishes this patent information upon  
47 approval of the NDA or a supplemental NDA in *Approved Drug Products with Therapeutic*  
48 *Equivalence Evaluations*, which is generally known as the *Orange Book*.

49  
50 An ANDA applicant must include in its ANDA a patent certification as described in section  
51 505(j)(2)(A)(vii) of the Act. The certification must make one of the following statements: (1)  
52 such patent information has not been filed; (2) such patent has expired; (3) the date on which  
53 such patent expires; or (4) such patent is invalid or will not be infringed by the manufacture, use,  
54 or sale of the drug product for which the ANDA is submitted. The fourth certification is known  
55 as a *paragraph IV certification*. The ANDA applicant must provide appropriate notice of a  
56 paragraph IV certification to each owner of the patent that is the subject of the certification and  
57 to the holder of the approved NDA to which the ANDA refers (21 U.S.C. 505(j)(2)(B)(i), 21  
58 CFR 314.95). Section 505(j)(5)(B)(iv) of the Act established an incentive for generic  
59 manufacturers to file paragraph IV certifications and to challenge listed patents as invalid, or not  
60 infringed, by providing for a 180-day period of marketing exclusivity:

61  
62 If the [ANDA] contains a [paragraph IV certification] and is for a drug for which a  
63 previous application has been submitted under this subsection continuing [sic]  
64 such a certification, the application shall be made effective not earlier than one  
65 hundred and eighty days after—

- 66  
67 (I) the date the Secretary receives notice from the applicant under the  
68 previous [ANDA] of the first commercial marketing of the drug  
69 under the previous [ANDA], or  
70  
71 (II) the date of a decision of a court in [a patent infringement  
72 action] holding the patent which is the subject of the  
73 certification to be invalid or not infringed, [the font size of  
74 this paragraph needs to be 11]

75  
76 whichever is earlier.

77  
78 This means that, in certain circumstances, an applicant who submits the ANDA containing the  
79 first paragraph IV certification to a patent is *protected from competition* from other generic  
80 versions of the same drug product for 180 days after the earliest of either the initial marketing of  
81 the first applicant's drug or a court decision that holds that the patent that is the subject of the

### *Contains Nonbinding Recommendations*

82 paragraph IV certification is invalid or not infringed. This marketing protection is commonly  
83 known as *180-day exclusivity*.

84

85

### 86 **III. DISCUSSION**

87

88 The 180-day period of generic drug exclusivity provides a very strong financial incentive for an  
89 ANDA applicant to challenge a patent that it believes it does not infringe or that it believes is  
90 invalid or unenforceable. The Congressional Budget Office (CBO) issued a report in July 1998  
91 entitled *How Increased Competition from Generic Drugs has Affected Prices in the*  
92 *Pharmaceutical Industry*. This report indicated that the price of a generic drug decreases with  
93 the entry of multiple manufacturers selling generic duplicates of a given innovator drug (see  
94 CBO report page 33). With less competition, an ANDA holder is able to derive higher profits.  
95 Thus, the opportunity to be the sole competitor to the innovator for up to 6 months is  
96 aggressively pursued.

97

98 Since the decisions in *Mova Pharmaceuticals, Inc. v. Shalala*, 140 F.3d 1060 (D.C.Cir. 1998)  
99 and *Granutec, Inc. v. Shalala*, 46 U.S.P.Q.2d 1398 (4th Cir. 1998), the first applicant who  
100 submits a substantially complete ANDA containing a paragraph IV certification to a listed patent  
101 is eligible for 180-day generic drug exclusivity.<sup>2</sup> As noted in a 1999 citizen petition response,<sup>3</sup>  
102 many of the current regulations were adopted prior to the *Mova* decision, when the Agency  
103 interpreted the statute to require that an ANDA applicant had to be sued and win its patent  
104 litigation to qualify for exclusivity. FDA's pre-*Mova* interpretation limited the number of times  
105 180-day exclusivity was granted because an ANDA applicant had to be first to challenge a patent  
106 and win the patent litigation to be eligible for 180-day exclusivity. The chance of having  
107 multiple ANDA applicants qualify for 180-day exclusivity was extremely low as evidenced by  
108 the number of times that 180-day exclusivity was granted.<sup>4</sup> By contrast, after the *Mova* decision,  
109 it is now easier to qualify for 180-day exclusivity. As a result, FDA has had to address a number  
110 of new issues, including eligibility for exclusivity when multiple paragraph IV certifications are  
111 filed on the same day.

112

113 Congress did not address, in the 180-day exclusivity provisions of the Act, the possibility that  
114 multiple applicants would submit patent challenges to FDA on the same day, when no applicant  
115 had submitted a challenge to the patent on a previous day. Similarly, FDA regulations now in  
116 effect do not address this specific situation. In August 1999, FDA proposed a multiple first  
117 applicant approach in a proposed rule addressing 180-day generic drug exclusivity (64 FR  
118 42873; August 6, 1999). FDA received comments both for and against this approach (see  
119 Docket 85N-0214). The proposed rule was withdrawn in 2002 for reasons unrelated to the

---

<sup>2</sup> The regulatory history of this issue has been previously described in the June 1998 CDER guidance for industry *180-Day Generic Drug Exclusivity Under the Hatch-Waxman Amendments to the Federal Food, Drug, and Cosmetic Act*.

<sup>3</sup> See response to 99P-1271/PSA1 and PSA2 issued August 2, 1999.

<sup>4</sup> In the years from 1984 to 1998, only three ANDA applicants qualified for 180-day exclusivity. Since the *Mova* decision in 1999, more than 60 ANDAs have received 180 days of exclusivity.

### *Contains Nonbinding Recommendations*

120 merits of the multiple first applicant approach (67 FR 66593; November 1, 2002). When the  
121 proposed rule was withdrawn, the Agency noted that it would continue to regulate directly from  
122 the statute and any applicable regulations, and make decisions on an issue-by-issue basis. The  
123 Agency continues to believe that the approach described in the proposed rule is a reasonable and  
124 appropriate interpretation of the statute. Two citizen petitions have specifically asked the  
125 Agency to follow the approach described in the proposed rule when addressing 180-day  
126 exclusivity in cases where there are multiple ANDAs containing challenges to the same patent  
127 submitted on the same day (see Dockets 00P-1445 and 03P-0217).

128  
129 Same day patent challenges generally occur when the expiration of 4 years of a 5-year  
130 exclusivity period under section 505(j)(5)(D)(ii) permits submission of ANDAs containing a  
131 paragraph IV certification as of a specific date, and multiple applicants vie to be first to make  
132 such a submission. Multiple submissions on the same day may also occur when a new patent is  
133 issued by the Patent and Trademark Office and submitted to FDA by the NDA sponsor after  
134 ANDAs have been submitted. Because new patents must be submitted to FDA within 30 days of  
135 issuance, ANDA applicants position themselves to be the first to submit a paragraph IV  
136 certification as soon as the patent is submitted to FDA – often exactly 30 days after patent  
137 issuance.

138  
139 Recently, there have been a number of cases in which multiple ANDA applicants or their  
140 representatives have sought to be the first to submit a patent challenge by lining up outside, and  
141 literally camping out adjacent to, an FDA building for periods ranging from 1 day to more than 3  
142 weeks. Concerns about liability, security, and safety led the property owners to prohibit lines of  
143 applicants before the date submissions may be made. This has lent an urgency to the question of  
144 how the Agency deals with multiple ANDA applicants submitting paragraph IV certifications on  
145 the same day. There are other periods of exclusivity expiring soon, and FDA believes it is  
146 possible there will be multiple ANDA submissions referencing the same listed drug. Because of  
147 the seriousness of these issues, it has been necessary to promptly provide information to the  
148 industry on how patent challenges may be made to FDA and how FDA will apply the 180-day  
149 exclusivity provisions of the statute to these submission.

150  
151 FDA intends to apply a *multiple first applicant* approach to eligibility for 180-day exclusivity by  
152 considering all substantially complete ANDAs, amendments, and supplements containing a  
153 paragraph IV certification to a listed patent that are submitted to the OGD document room on the  
154 same day as being *first applicants*, when no paragraph IV certification to the patent has been  
155 submitted on any previous day, as long as the applications comply with the applicable  
156 requirements for submission. FDA considers this approach to be an appropriate interpretation of  
157 the statutory language and consistent with the goals of the Hatch-Waxman Amendments. This  
158 approach will provide all applicants submitting patent challenges on the same day an opportunity  
159 to share in exclusivity; it permits submission by U.S. mail or courier or delivery service; it  
160 permits, but does not require, submission in person; it avoids the random aspect of a lottery or  
161 mail room date stamp approach; it will prevent disputes over *who's first*, which rely on video and  
162 other evidence; and it will preserve the safety and security of the applicants and FDA property  
163 and staff.<sup>5</sup>

---

<sup>5</sup> Consistent with FDA's current practice, submission by facsimile or email is *not* considered *officially submitted* for purposes of determining the date of submission.

### **IV. HOW MULTIPLE APPLICANT EXCLUSIVITY WORKS**

Under the approach described in this guidance, FDA intends to treat all ANDAs containing a paragraph IV certification to a listed patent that are submitted on the same day as being submitted at the same time for purposes of 180-day exclusivity when no ANDA for the same drug product containing a paragraph IV certification to the same patent has been submitted on a previous day. Thus, none of those same-day submissions would be considered "previous[ly] . . . submitted" to another patent challenge submitted on that same day for purposes of section 505(j)(5)(B)(iv), and all applicants who fulfill the requirements for submission would be considered *first applicants*. The Agency intends to approve a first applicant's ANDA whenever it is ready for approval. Whether and when the Agency will be able to approve a first applicant's ANDA will depend upon a number of factors, including, for example, the status of its scientific submissions to the Agency. Exclusivity begins to run, independent of the approval, with the commercial marketing of that drug product or with a court decision on the patent, whichever comes first. Exclusivity will be triggered for all of the first applicants for a specific listed patent by the earlier of commercial marketing by one of the first applicants or by a court decision (regarding the patent as to which the applicant is a first applicant) finding the patent invalid, unenforceable, or not infringed. The commercial marketing trigger will begin exclusivity as to all of the listed patents; a court decision will only begin the running of exclusivity as to the patents addressed in the decision.

During the exclusivity period, FDA may approve any other first applicant's ANDA, but no other ANDAs. Any first applicant whose ANDA is approved after the exclusivity has been triggered will share in the remaining period of exclusivity. Once the 180-day exclusivity period has run, FDA may approve all subsequent ANDAs.

Obviously, this approach may deprive any one applicant of the chance to be the sole competitor to the NDA holder. But exclusivity is already structured in such a way that eligibility for exclusivity does not guarantee 180 days as the sole marketed generic drug (i.e., the court decision trigger could start exclusivity before an ANDA is approved, or uncertainty over the patent could result in no marketing of an approved product until an affirmation in the Federal Circuit of a district court win). A *multiple first applicant* approach to 180-day exclusivity will limit the number of ANDAs approved during the exclusivity period to the number of first applicants. Moreover, making multiple applicants eligible for exclusivity may give each first applicant some part of the benefit from the early challenge to the listed patent.

The approach to 180-day exclusivity described in this guidance will apply only in cases in which multiple ANDA applicants submit paragraph IV certifications challenging the same listed patent or patents on the same *first* day. The Agency recognizes the highly competitive nature of the generic drug approval process and the possibility of substantial profits for the recipient of 180-day exclusivity. There is no public health reason to encourage and reward competition over being the *first* to submit a paragraph IV certification within minutes or seconds of another such applicant. The Agency believes that, where there are multiple filings on the same first day, the

## *Contains Nonbinding Recommendations*

209 *multiple first applicant* approach is consistent with language of section 505(j)(5)(B)(iv) and with  
210 the intent of both the 180-day exclusivity provision and the Hatch-Waxman Amendments.

211

212

### 213 **V. IMPLEMENTATION**

214

215 This guidance is being issued as a level 1 guidance for immediate implementation, consistent with  
216 FDA's good guidance practices regulation (21 CFR 10.115). The Agency believes that given the  
217 need for public guidance on this pressing issue and existing liability, safety, and security concerns,  
218 public comment is neither feasible nor appropriate before implementing this guidance. FDA  
219 intends to apply the approach described in this guidance to all 180-day exclusivity determinations  
220 made by FDA on or after the date of publication of the notice announcing the availability of this  
221 guidance involving situations in which the first paragraph IV certifications to a specific patent are  
222 submitted on the same day (including patent certifications that were submitted prior to the date of  
223 the notice where the exclusivity determination has not yet been made). The approach described in  
224 this guidance will remain in effect until superseded.

225

226
