- Generic drugs approved under Section 505(j) of the FD&C Act that have qualified for 180-day exclusivity pursuant to Section 505(j)(5)(B)(iv) of the FD&C Act
- Generic drugs approved under Section 505(j) of the FD&C Act that have qualified for Competitive Generic Therapy (CGT) exclusivity pursuant to Section 505(j)(5)(B)(v) of the FD&C Act

This section is arranged in alphabetical order by name of the active ingredient, followed by the proprietary name (brand name or trade name) of the drug product. Active ingredient headings for multiple active ingredient, fixed-combination drug products are arranged alphabetically.

Individual descriptions of the protected use have been added to each Orphan Drug Exclusivity entry listed in the Orange Book. Such descriptions of Orphan Drug Exclusivity were included beginning with the 38th edition of the Orange Book. The ODE* code means that the timing of approval of certain follow-on applications may be subject to delay due to ODE for another drug that has the same active moiety.

For an explanation of the codes used in the *Addendum*, see the *Patent and Exclusivity Terms* section. The exclusivity codes are general shorthand descriptions and do not necessarily identify, with specificity, the actual scope of exclusivity.

Patent Information

The FD&C Act requires that certain patent information be filed with all newly submitted new drug applications (NDA) and with certain supplements to approved NDAs. Form FDA 3542a must be used for this pre-approval submission.¹

The FD&C Act also requires that certain patent information be filed after approval of an NDA. To be considered timely filed, such patent information must be submitted according to the following timeframes:

- not later than 30 days after the date of approval of the NDA² or supplement; or
- not later than 30 days after the date of issuance of the patent when a patent is issued after approval of the NDA or supplement.

Form FDA 3542 must be used for these submissions.³ FDA publishes certain information from Form FDA 3542 in the Orange Book.

The Orange Book includes the patent submission date (i.e., the date on which FDA receives patent information from the NDA holder on Form FDA 3542) for each newly listed patent to facilitate assessments of whether patent information is untimely filed with respect to a pending 505(b)(2) application or abbreviated new drug application (ANDA) and whether patent information was submitted before the date on which a 505(b)(2) application or ANDA (excluding an amendment or supplement to the 505(b)(2) application or ANDA) was submitted.⁴

Section 505(c)(2) of the FD&C Act requires, with reference to Section 505(b)(1)(A)(viii) of the FD&C Act, that applicants submit certain patent information for each patent for which a claim of patent infringement could reasonably be asserted if a person not licensed by the owner of the patent engaged in the manufacture, use, or sale of the drug and that:

- claims the drug for which the applicant submitted the application and is a drug substance (active ingredient) patent or a drug product (formulation or composition) patent; or
- claims a method of using such drug for which approval has been granted in the application.

This information, as provided by the NDA holder on Form FDA 3542, will be published in the Orange Book, as described above. An NDA holder submitting information on a patent that claims both the drug substance and the drug product (and is eligible for listing on either basis) is required only to specify that the patent claims either the drug substance or the drug product.⁵

The Addendum lists patent and exclusivity information up to January of the Edition year. The monthly Cumulative Supplements to the Annual Edition list patent and exclusivity information changes since the Annual Edition Addendum. Since all parts of this publication are subject to changes, additions, or

¹ 21 CFR 314.53(c)(2)(i); 21 CFR 314.53(d).

² Please note that the date of approval for an NDA for a drug for which FDA intends to recommend controls under the Controlled Substances Act is the later of the date on the approval letter for the NDA or the date of issuance of the interim final rule controlling the drug (see Section 505(x)(1) and (2) of the FD&C Act).

³ 21 CFR 314.53(c)(2)(ii); 21 CFR 314.53(d).

⁴ See 21 CFR 314.50(i)(4) and 314.94(a)(12)(vi); see also 21 CFR 314.107(b)(3)(i). The submission date for patent information is determined in accordance with 21 CFR 314.53(d)(5).
