Introduction to FDA's MedWatch Adverse Event Reporting Program

Brenda J. Rose, PharmD

FDA Office of Health and Constituent Affairs

February 9, 2016

Webinar Hosted by CDER's Office of Communication, Division of Drug Information (DDI)

Learning Objectives

- Describe the FDA MedWatch Program.
- Identify the types of adverse events and product problems that should be reported to FDA.
- Explain how to submit a report to the FDA MedWatch Program.
- Summarize how to obtain safety information from FDA MedWatch.

Office of the Commissioner

- Office of Foods
  - 
    Center for **F**ood **S**afety & **A**pplied **N**utrition
  -     Center for **V**eterinary **M**edicine

FDA Regulates $1 Trillion Worth of Products a Year

Every morning when you wake up and

brush your teeth
put in your contact lenses
microwave your breakfast
take your medicine
feed your pet
select a lipstick
go grocery shopping
get a flu shot or a mammogram….

You have been touched by the
U. S. Food and Drug Administration.

Assessment Question 1

Which is *Not* Regulated by the FDA?

A) Aspirin

B) Anti-lice shampoo

C) Insect repellent

D) Lipstick

FDA MedWatch and Patient Safety

- Reports **IN**
  - Reports about problems with medical products come **IN** to MedWatch.
- Safety **OUT**
  - Safety information about medical products goes **OUT** to health professionals, patients, and consumers.

Your gateway for learning about important safety information and reporting serious problems with medical products.

MedWatch on the World Wide Web

1993

MedWatch Voluntary Reporting Form Launched

Why Report?

- Not all products have clinical data/trials before clearance to market
- Limitations of clinical trials to identify safety signals before marketing
- Number of patients tested may be too small to detect serious but rare problems
- Trials are brief

MedWatch
Reporting IN

- Anyone can report a serious problem.

Walla Walla, WA – Pharmacist
Sacramento, CA – Nurse
Houston, TX – Dentist
Tallahassee, FL – Consumer
Portland, ME – Physician Assistant

MedWatch
Reporting IN

- One person can make a difference.

MedWatch - What to Report

Drugs

Medical Devices

Biologics

Combination Products

Special Nutritional Products

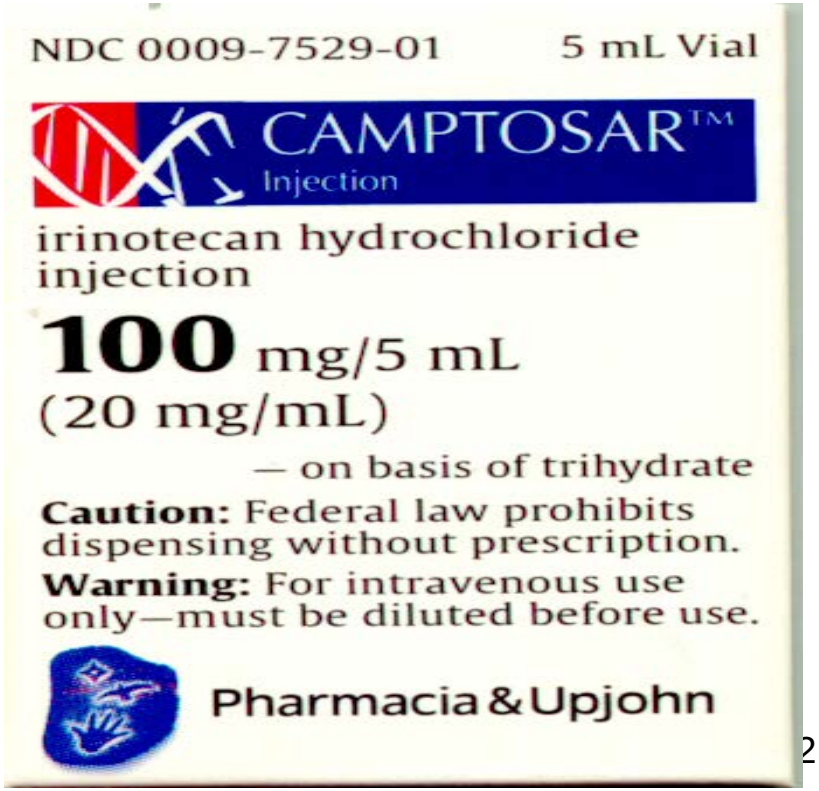
- Any event that:
  - Is fatal.
  - Is life-threatening.
  - Is permanently disabling.
  - Requires/ prolongs hospitalization.
  - Causes a birth defect.
  - Requires intervention to prevent permanent impairment or damage.
  - Potential for harm/close calls (drugs or devices).

MedWatch - What to Report

Labels- Expression of Strength

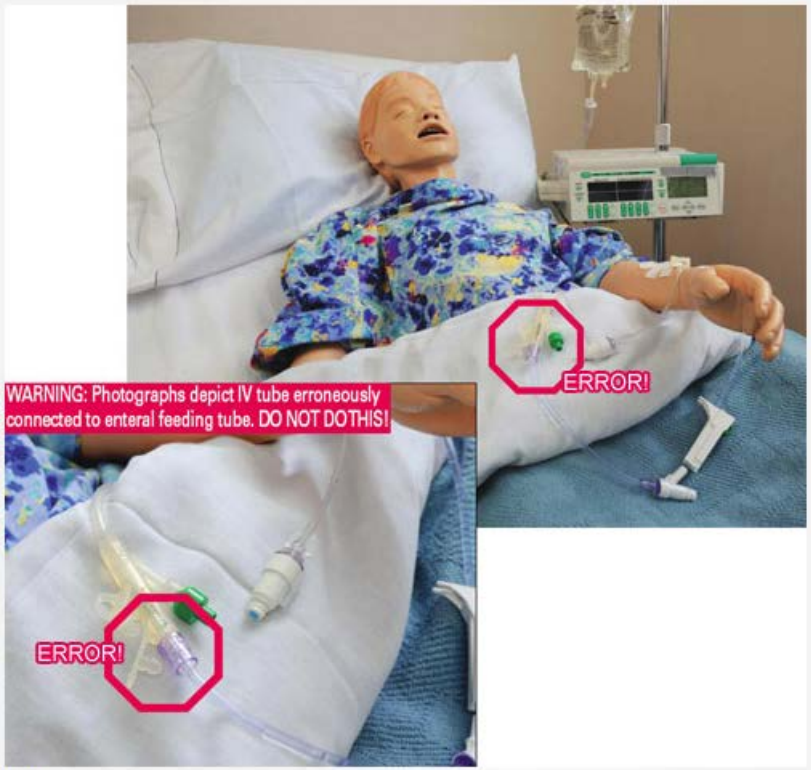
Before

After



Reporting IN – Potential for Harm

IV tubing erroneously connected to enteral feeding tube



CASE STUDY

- A child had both a gastric feeding tube for nutrition and an IV for medicine and hydration
- When the child's gown was changed, a family member inadvertently attached the IV tubing to the gastric feeding tube
- The medicine was delivered through the feeding tube into the stomach
- There was no patient harm since the event was noted in a timely manner

POTENTIAL FOR HARM: Moderate

FDA is also interested in cases where the potential for harm exists

Such reports help FDA identify and better understand the risks associated with medical products

http://www.fda.gov/MedicalDevices/Safety/AlertsandNotices/TubingandLuerMisconnections/ucm313275.htm

Assessment Question 2

True or False. You must be a healthcare professional in order to submit a report to MedWatch.

False

MedWatch- Reporting IN

- How to Report:
  - Online (www.fda.gov/medwatch/report.htm)
  - Download the form
    - Mail
    - Fax 1–800–332–0178
- For questions about the form:
  - 1–800–332–1088.

Section A – About the Problem

What kind of problem was it? (Check all that apply)
Were hurt or had a bad side effect (including new or worsening symptoms)
Used a product incorrectly which could have or led to a problem
Noticed a problem with the quality of the product
Had problems after switching from one product maker to another maker

Did any of the following happen? (Check all that apply)
Hospitalization – admitted or stayed longer
Required help to prevent permanent harm (for medical devices only)
Disability or health problem
Birth defect
Life-threatening
Death (Include date)
Other serious/important medical incident (Please describe below)

Date the problem occurred (mm/dd/yyyy)

Tell us what happened and how it happened. (Include as many details as possible)
Continuation Page

List any relevant tests or laboratory data if you know them. (Include dates)
Continuation Page

For a problem with a product, including
- prescription or over-the-counter medicine
- biologics, such as human cells and tissues used for transplantation (for example, tendons, ligaments, and bone) and gene therapies
- nutrition products, such as vitamins and minerals, herbal remedies, infant formulas, and medical foods
- cosmetics or make-up products
- foods (including beverages and ingredients added to foods)

Go to Section B

For a problem with a medical device, including
- any health-related test, tool, or piece of equipment
- health-related kits, such as glucose monitoring kits or blood pressure cuffs
- implants, such as breast implants, pacemakers, or catheters
- other consumer health products, such as contact lenses, hearing aids, and breast pumps

Go to Section C (Skip Section B)

MedWatch Online Voluntary Reporting Form

Welcome

What to Report to FDA MedWatch:

Use the MedWatch form to report adverse events that you observe or suspect for human medical products, including serious drug side effects, product use errors, product quality problems, and therapeutic failures for:

- Prescription or over-the-counter medicines, as well as medicines administered to hospital patients or at outpatient infusion centers
- Biologics (including blood components, blood and plasma derivatives, allergenic, human cells, tissues, and cellular and tissue-based products (HCT/Ps))
- Medical devices (including in vitro diagnostic products)
- Combination products
- Special nutritional products (dietary supplements, infant formulas, and medical foods)
- Cosmetics
- Foods/beverages (including reports of serious allergic reactions)

What Happens to Your MedWatch Report?

- Report is captured in a database.
- FDA safety evaluator reviews the report.
- FDA safety evaluator looks for similar reports.
- FDA review division may consult with manufacturer.
- FDA /manufacturer conducts further epidemiological studies or post-market clinical trials as needed.

How can MedWatch Reports Result in Product Changes?

- Update the product label.
- Include a Medication Guide.
- Request a change in the product's design, process, packaging, or distribution.
- Request a product recall.

Eszopiclone Containing Sleep Aids: Drug Safety Communication - Can Cause Next-Day Impairment

Including Lunesta and generics

[Posted 05/15/2014]

AUDIENCE: Pharmacy, Primary Care Medicine

ISSUE: FDA has notified health professionals and their medical care organizations of a new warning that the insomnia drug Lunesta (eszopiclone) can cause next-day impairment of driving and other activities that require alertness. FDA recommends a decreased starting dose of Lunesta to 1 mg at bedtime. Women and men are equally susceptible to impairment from Lunesta, so the recommended starting dose of 1 mg is the same for both. FDA approved changes to the Lunesta prescribing information and the patient Medication Guide to include these new recommendations. The drug labels for generic eszopiclone products will also be updated to include these changes.

BACKGROUND: A study of Lunesta found that the previously recommended dose of 3 mg can cause impairment to driving skills, memory, and coordination that can last more than 11 hours after receiving an evening dose (see Data Summary). Despite these driving and other problems, patients were often unaware they were impaired. The new lower recommended starting dose of 1 mg at bedtime will result in less drug in the blood the next day.

RECOMMENDATION: Health care professionals should follow the new dosing recommendations when starting patients on Lunesta. Patients should continue taking their prescribed dose of Lunesta and contact their health care professionals to ask about the most appropriate dose for them. FDA is continuing to evaluate the risk of impaired mental alertness with the entire class of sleep aid drugs, including over-the-counter drugs available without a prescription, and will update the public as new information becomes available.

Capoten (captopril) Tablets		X	X			
Jevtana (cabazitaxel) Injection		X	X	X		
Rocephin (ceftriaxone sodium) for Injection		X	X		X	
(Click on drug name to go to detailed view)	BW	C	W	P	AR	PPI/MG
Angeliq (drospirenone and estradiol) Tablets			X	X		

Monthly Safety Labeling Changes

MedWatch Communication OUT

- Distributes important and timely information about safety issues involving medical products via MedWatch safety alerts:
- 149 MedWatch Alerts in 2015
  - 76 drugs and therapeutic biologics
  - 65 medical devices
  - 7 products with undeclared ingredients
  - 1 special nutritional
- 484 safety labeling changes posted for medical products in 2015
  - Update to the prescribing information, package insert, medication guide, and/or product label

Conclusion/Review

- MedWatch is the FDA's safety information and adverse event reporting program.
- Through FDA MedWatch, healthcare professionals should report serious events adverse events.
- Healthcare professionals can submit the completed Form 3500 to the FDA MedWatch system online, by fax, or mail.
