## Name the Animal Parents! Matching Game 2

FDA's Center for Veterinary Medicine works hard to keep the CVM Animal Pals—and all animals—healthy. We make sure that the medicines used in pets and farm animals are safe and work the way they're supposed to. We also make sure that food for animals is safe and has the right ingredients, and that the food we get from some farm animals, like milk from cows and eggs from chickens, is safe for us to eat, too!

Do you know what each CVM Animal Pal calls its father and mother?

Match the animal below with the names of its parents in the list to the right.

1. Sire and Dam
2. Stallion and Mare
3. Rooster and Hen
4. Tom and Queen
5. Bull and Cow
6. Boar and Sow

In the small box inside each picture, write the number from the list that matches the names of the Animal Pal's parents.
